
Contents

Notations	ix
Introduction	xi
Chapter 1. Stationary Increments of Discrete Time Stochastic Processes: Spectral Representation	1
Chapter 2. Extrapolation Problem for Stochastic Sequences with Stationary nth Increments	9
2.1. The classical method of extrapolation	9
2.2. Minimax (robust) method of extrapolation	21
2.3. Least favorable spectral density in the class \mathcal{D}_f^0	24
2.4. Least favorable spectral densities which admit factorization in the class \mathcal{D}_f^0	25
2.5. Least favorable spectral density in the class \mathcal{D}_v^u	29
2.6. Least favorable spectral density which admits factorization in the class \mathcal{D}_v^u	29
Chapter 3. Interpolation Problem for Stochastic Sequences with Stationary nth Increments	31
3.1. The classical method of interpolation	31
3.2. Minimax method of interpolation	41
3.3. Least favorable spectral densities in the class $\mathcal{D}_{0,n}^-$	43
3.4. Least favorable spectral densities in the class $\mathcal{D}_{M,n}^-$	47

Chapter 4. Extrapolation Problem for Stochastic Sequences with Stationary nth Increments Based on Observations with Stationary Noise	53
4.1. The classical method of extrapolation with noise	53
4.2. Extrapolation of cointegrated stochastic sequences	71
4.3. Minimax (robust) method of extrapolation	75
4.4. Least favorable spectral densities in the class $\mathcal{D}_f^0 \times \mathcal{D}_g^0$	80
4.5. Least favorable spectral densities which admit factorization in the class $\mathcal{D}_f^0 \times \mathcal{D}_g^0$	82
4.6. Least favorable spectral densities in the class $\mathcal{D}_v^u \times \mathcal{D}_\varepsilon$	84
4.7. Least favorable spectral densities which admit factorization in the class $\mathcal{D}_v^u \times \mathcal{D}_\varepsilon$	86
Chapter 5. Interpolation Problem for Stochastic Sequences with Stationary nth Increments Based on Observations with Stationary Noise	89
5.1. The classical method of interpolation with noise	89
5.2. Interpolation of cointegrated stochastic sequences	96
5.3. Minimax (robust) method of interpolation	97
5.4. Least favorable spectral densities in the class $\mathcal{D}_{0,f}^- \times \mathcal{D}_{0,g}^-$	100
5.5. Least favorable spectral densities in the class $\mathcal{D}_{2\varepsilon_1} \times \mathcal{D}_{1\varepsilon_2}$	103
Chapter 6. Filtering Problem of Stochastic Sequences with Stationary nth Increments Based on Observations with Stationary Noise	107
6.1. The classical method of filtering	107
6.2. Filtering problem for cointegrated stochastic sequences	119
6.3. Minimax (robust) method of filtering	124
6.4. Least favorable spectral densities in the class $\mathcal{D}_f^0 \times \mathcal{D}_g^0$	129
6.5. Least favorable spectral densities which admit factorization in the class $\mathcal{D}_f^0 \times \mathcal{D}_g^0$	131
6.6. Least favorable spectral densities in the class $\mathcal{D}_v^u \times \mathcal{D}_\varepsilon$	134
6.7. Least favorable spectral densities which admit factorization in the class $\mathcal{D}_v^u \times \mathcal{D}_\varepsilon$	135
Chapter 7. Interpolation Problem for Stochastic Sequences with Stationary nth Increments Observed with Non-stationary Noise	139
7.1. The classical interpolation problem in the case of non-stationary noise	140
7.2. Minimax (robust) method of interpolation	148
7.3. Least favorable spectral densities in the class $\mathcal{D}_{0,\mu}^- \times \mathcal{D}_{0,\mu}^-$	150
7.4. Least favorable spectral densities in the class $\mathcal{D}_{M,\mu}^- \times \mathcal{D}_{M,\mu}^-$	153

Chapter 8. Filtering Problem for Stochastic Sequences with Stationary nth Increments Observed with Non-stationary Noise . .	155
8.1. The classical filtering problem in the case of non-stationary noise . . .	156
8.2. Minimax filtering based on observations with non-stationary noise . . .	170
8.3. Least favorable spectral densities in the class $\mathcal{D}_f^0 \times \mathcal{D}_g^0$	174
8.4. Least favorable spectral densities which admit factorizations in the class $\mathcal{D}_f^0 \times \mathcal{D}_g^0$	175
8.5. Least favorable spectral densities in the class $\mathcal{D}_u^u \times \mathcal{D}_\varepsilon$	177
8.6. Least favorable spectral densities which admit factorizations in the class $\mathcal{D}_v^u \times \mathcal{D}_\varepsilon$	178
Chapter 9. Stationary Increments of Continuous Time Stochastic Processes: Spectral Representation	181
Chapter 10. Extrapolation Problem for Stochastic Processes with Stationary nth Increments	187
10.1. Hilbert space projection method of extrapolation	187
10.2. Minimax (robust) method extrapolation	205
10.3. Least favorable spectral densities in the class $\mathcal{D}_f^0 \times \mathcal{D}_g^0$	208
10.4. Least favorable spectral density in the class \mathcal{D}_f^0	210
10.5. Least favorable spectral density which admits factorization in the class \mathcal{D}_f^0	211
10.6. Least favorable spectral densities in the class $\mathcal{D}_v^u \times \mathcal{D}_\varepsilon$	213
10.7. Least favorable spectral densities which allow factorization in the class \mathcal{D}_δ	215
Chapter 11. Interpolation Problem for Stochastic Processes with Stationary nth Increments	217
11.1. Hilbert space projection method of interpolation	217
11.2. Minimax (robust) method of interpolation	226
11.3. Least favorable spectral densities in the class $\mathcal{D}_f^0 \times \mathcal{D}_g^0$	229
11.4. Least favorable spectral density in the class \mathcal{D}_f^0	230
11.5. Least favorable spectral densities in the class $\mathcal{D}_{1/f}^0 \times \mathcal{D}_{1/g}^0$	231
11.6. Least favorable spectral density in the class $\mathcal{D}_{1/f}^0$	233
11.7. Least favorable spectral densities in the class $\mathcal{D}_v^u \times \mathcal{D}_\varepsilon$	234
11.8. Least favorable spectral density in the class \mathcal{D}_v^u	235
11.9. Least favorable spectral density in the class $\mathcal{D}_{2\varepsilon}$	236
Chapter 12. Filtering Problem for Stochastic Processes with Stationary nth Increments	239
12.1. Hilbert space projection method of filtering	239

12.2. Minimax (robust) method of filtering	246
12.3. Least favorable spectral densities in the class $\mathcal{D}_f^0 \times \mathcal{D}_g^0$	248
12.4. Least favorable spectral densities in the class $\mathcal{D}_v^u \times \mathcal{D}_\varepsilon$	250
Problems to Solve	253
Appendix	259
