Foreword	ix
Yvette DEWOLF	
Introduction: Aeolian Dynamics and Processes	xiii
Yann CALLOT	
Chapter 1. Aeolian Landforms in Deserts	1
Yann CALLOT	
1.1. Forms and surface states	1
1.2. Ablation forms	2
1.2.1. Desert pavement	2
1.2.2. Coherent rock landforms	5
1.2.3. A mixed ablation shape: hydro-aeolian depressions	15
1.3. Accumulation formations	16
1.3.1. Amorphous accumulations	18
1.3.2. Smaller aeolian formations	21
1.3.3. Sandy accumulations without sharp crests	27
1.3.4. Dunes with sharp crests	28
1.3.5. Combinations of sifs	36
1.3.6. Non-sandy aeolian accumulations	43
1.4. Aeolian systems	47
1.4.1. Initial combinations: arrow, elb and draa	48
1.4.2. Interdune spaces	50

1.4.3. Polygenic formations	52
1.5. Ergs, the most complex aeolian systems	60
1.5.1. Definition	60
1.5.2. The formation of ergs	61
1.5.3. From the stability of forms... to a whole new scale: the Grand Erg Occidental	65
1.6. Conclusion: a new paradigm to explain the organization and orientation of active dunes	70
1.7. Martian dunes, still mobile...	72
1.8. References	75
Chapter 2. Humans and Winds in Deserts	79
Yann CALLOT	
2.1. Traditional societies and the wind	80
2.2. The battle against sand encroachment, or the Barrel of the Danaiids: the Zouerate railroads (Mauritania)	83
2.3. The Dust Bowl, the first ecological disaster of the 20th century in a developed country	87
2.4. The western Algerian Green Barrier, or an error in management	91
2.4.1. A “barrier” in an unfavorable physical environment	91
2.4.2. Difficult implementation	93
2.4.3. A basic error in understanding aeolian dynamics	98
2.5. References	105
Chapter 3. Living in Deserts	107
Marc CÔTE	
3.1. Humans and the desert	108
3.1.1. A “desert civilization”	108
3.1.2. There are deserts and then there are deserts	108
3.1.3. The desert, Islam and oil	110
3.1.4. Antagonistic and complementary civilizations	110
3.2. Bedouin civilizations	113
3.2.1. Nomads	113
3.2.2. The power of the group	114

3.2.3. Astonishing knowledge	114
3.2.4. The fundamentals of pastoralism	115
3.2.5. Nomad territories	117
3.2.6. Collective lands	118
3.2.7. Dromedaries and Bactrian camels	120
3.2.8. A large-scale ecological transformation: desertification	122
3.2.9. Social transformation: sedentarization	123
3.2.10. New forms of pastoralism	123
3.2.11. The new faces of group structure	125
3.3. Hydraulic civilization	126
3.3.1. Oasis life	126
3.3.2. The fundamentals of hydraulic civilizations	126
3.3.3. Water territories	127
3.3.4. Cradles of hydraulic civilizations	127
3.3.5. Hydraulic techniques	129
3.3.6. Collective and individual hydraulic systems	132
3.3.7. Modes of sharing a rare resource	134
3.3.8. The diffusion of techniques	134
3.3.9. Hot deserts and cold deserts	137
3.3.10. Today: from small wells to deep drilling	138
3.4. A salt civilization?	140
3.4.1. Societies in quest of salt	140
3.4.2. Salt territories	141
3.4.3. The logistics of salt	142
3.4.4. An important period in the history of the Sahara	143
3.4.5. A salt civilization?	144
3.5. Urban civilizations in the desert	144
3.5.1. Cities	144
3.5.2. The fundamentals of urban life	145
3.5.3. The city and the road	147
3.5.4. Networks of urban centers	148
3.5.5. Capitals under the sun	149
3.5.6. The city and water	150
3.5.7. The city and the desert today	153
3.6. Conclusion	153
3.7. References	154
List of Authors	157
