Introduction	xi
Part 1. The Person in the Age of Telecare	1
Chapter 1. The Advent of Digital Healthcare	3
1.1. Digital healthcare as an ecosystem	3
1.2. Telemedicine: medicine without patients?.	13
1.3. Telemonitoring of chronic diseases: a national priority	15
1.4. Specific features of telecare	16
Chapter 2. The Human Ethical Challenge	19
2.1. Ethical background of telecare	22
2.2. Circumscribing the field of influence of medical ethics.	25
2.2.1. Communication between doctor and patient	25
2.2.2. The contribution of care ethics	28
2.3. The person in telecare.	29
Part 2. Telecare Phenomenology	35
Introduction to Part 2	37
Chapter 3. A Cross-dimensional Look at the “Patient Experience”	39
3.1. Medico-economic evaluations and feedback	42
3.2. Evaluation is the key to deployment	44
3.3. MAST and RENEWING HeALTH.	47

3.4. Toward a psycho-emotional approach to quality of life	49
3.4.1. The SF-36 questionnaire.	50
3.5. Techniques and self-experience.	58
3.6. The telepatient: the neutral object of a symptom to be deciphered?. . .	63
3.7. Temporality and sensitivity at the heart of the experience	66
3.8. A renewed sense of patient experience.	71
Chapter 4. The Patient Experience under Telemonitoring	75
4.1. Telediabetology	76
4.2. Autonomous home dialysis telemonitoring	84
4.3. Telecardiology	90
4.4. Medical telemonitoring: an objectifying practice?	96
Chapter 5. The Person Standing the Test of Digital Clocks	101
5.1. Synchronized participants in a network	102
5.2. The cardiac patient: “real-time” data producer	108
5.3. Renal failure or the “chrono-responsible” patient	112
5.3.1. Application for prevention and monitoring.	114
5.3.2. Preventive action (non-dialyzed patient)	115
5.3.3. Follow-up action (dialysis patient).	117
5.3.4. A “chrono-responsible” patient.	119
5.4. Diabetic patient as “synchronized interactive patient”	120
5.4.1. A self-learning application	120
5.4.2. The telepatient as an “interactive” patient	122
5.5. Compliance and concordance	124
5.6. Harmonizations and phase shifts	127
Chapter 6. Experiential Knowledge of the “Subject of Care”	133
6.1. Constructing links with patients.	134
6.1.1. Representativeness of the panel	135
6.1.2. Preparation and scope of the interviews.	139
6.1.3. Presentation of the project to the patients.	139
6.2. Wearing a heart defibrillator.	141
6.2.1. “Les Porteurs” patient association	141
6.2.2. Association de Porteurs de défibrillateurs cardiaques	141
6.2.3. Expert patients	142
6.2.4. Pacemakers and implantable automatic defibrillators.	143
6.2.5. Standard protocol	145
6.2.6. Experience of the protocol	146
6.2.7. Carriers’ words	149
6.3. Performing daily home dialysis	156

6.3.1. “Renaloo” patient association	156
6.3.2. “Calydial” association	157
6.3.3. Tenon Hospital (AP-HP- 75) and other actors	157
6.3.4. The cyclers and communicating objects	158
6.3.5. Standard protocol	159
6.3.6. Interviewees	160
6.3.7. Specifics of the protocol	161
6.3.8. Words from people in independent home dialysis	162
6.4. Managing diabetes independently	166
6.4.1. CERITD	166
6.4.2. “Calydial” association	167
6.4.3. Standard protocol	169
6.4.4. Interviewees (and collected testimonies)	170
6.4.5. Opinions of people under independent home insulin therapy	171
6.5. Recognizing the patient as a human and co-caregiver	174
6.6. Expanding on the recognition of self-management skills	177
6.7. Sharing the feeling of telecare	178
6.7.1. Autonomy	178
6.7.2. Psychological support	180
6.7.3. Information sharing	181
6.7.4. Protocol at home	182
6.7.5. Relationship to the disease	182
6.8. Reconsidering the order of the person	183
6.9. Toward a biopsychosocial telecare model	184
Part 3. Toward an Ethics of “Time-sensitive” Telecare	187
Introduction to Part 3	189
Chapter 7. Subjectivizing the Future: or, the “Patient-Project”	
Temporality	191
7.1. Anatomy of anticipation	195
7.2. The clocks that govern us	196
7.3. Stressors	200
7.4. Shift in patient experience: stress and incoordination	201
7.5. Affects as regulators	204
7.6. The future in sight	208
7.7. Anticipation as action project	210
7.8. “Affordance” as an anticipation vector	211
7.9. The patient as <i>poiesis</i> and <i>self-project</i>	215
7.10. The project as a balancing dynamic	217
7.11. The meaning of the joint entry of the temporal and emotional	220

Chapter 8. “Chrono-sensitivity”: From Concept to Ethics	223
8.1. Telecare as “chrono-technology”	224
8.2. Telecare as a relational practice	228
8.3. Chrono-sensitivity: a hybrid concept	229
8.4. Ethical foundations of chrono-sensitive telecare	230
8.4.1. Autonomy and humanity of telecare	231
8.5. Care ethics tuned to telecare	234
8.5.1. Normative evaluation of the chrono-sensitive telecare	240
Conclusion	241
List of Abbreviations	245
