<b>Preface</b> . . . . .	xi
--------------------------	----

<b>Chapter 1. Artificial Intelligence and Sustainable Development Goals: An Overview</b> . . . . .	1
--	---

Misha KAKKAR

1.1. Introduction . . . . .	1
1.1.1. SDG 1 – no poverty . . . . .	3
1.1.2. SDG 2 – zero hunger . . . . .	5
1.1.3. SDG 3 – good health and well-being . . . . .	7
1.1.4. SDG 4 – quality education . . . . .	10
1.1.5. SDG 6 – clean water and sanitation . . . . .	11
1.1.6. SDG 7 – affordable and clean energy . . . . .	12
1.1.7. SDG 8 – decent work and economic growth . . . . .	14
1.1.8. SDG 11 – sustainable cities and communities . . . . .	15
1.1.9. SDG 13 – climate change . . . . .	19
1.1.10. SDG 14 – life below water . . . . .	21
1.1.11. SDG 15 – life on land . . . . .	21
1.2. Conclusion . . . . .	22
1.3. References . . . . .	23

<b>Chapter 2. Technologies and Frameworks for Sustainable Smart Cities</b> . . . . .	25
--	----

Depalle Sandhya RANI, Jagu Yeswanth Sai MAHESH, Swati SUCHARITA and Meerja Akhil JABBAR

2.1. Introduction: embracing smart cities . . . . .	26
2.1.1. Technological infrastructure: a backbone of smart cities . . . . .	27

2.1.2. The role of AI in smart cities . . . . .	28
2.1.3. IoT and data connectivity . . . . .	29
2.1.4. Case study: Singapore's smart nation . . . . .	29
2.1.5. Environmental sustainability in smart cities . . . . .	31
2.1.6. Challenges and opportunities . . . . .	31
2.1.7. Future research and innovations . . . . .	33
2.2. Technologies used in smart cities . . . . .	33
2.2.1. AI in smart cities . . . . .	33
2.2.2. AI-driven traffic management systems . . . . .	34
2.2.3. AI in predictive infrastructure maintenance . . . . .	34
2.2.4. Internet of Things: enabling connectivity . . . . .	34
2.2.5. IoT in waste management . . . . .	35
2.2.6. IoT in public utilities . . . . .	35
2.2.7. Internet of Medical Things: enhancing public health . . . . .	36
2.2.8. IoMT in disease monitoring and outbreak prediction . . . . .	36
2.2.9. Cloud computing in smart cities . . . . .	36
2.2.10. Edge computing: processing data locally . . . . .	37
2.2.11. The role of 5G in enabling smart city technologies . . . . .	37
2.2.12. Industrial Internet of Things in smart cities . . . . .	37
2.2.13. IIoT in smart grids . . . . .	38
2.2.14. Smart lighting systems . . . . .	38
2.2.15. Smart water management systems: enhancing urban water efficiency and safety . . . . .	38
2.2.16. Autonomous vehicles in smart cities: transforming urban travel . . . . .	39
2.2.17. Smart parking solutions: reducing city congestion and simplifying parking . . . . .	39
2.3. Smart buildings: making cities greener and more comfortable for everyday life . . . . .	40
2.3.1. Urban air quality monitoring: safeguarding health through real-time data . . . . .	40
2.3.2. AI in urban planning: shaping the future of livable cities . . . . .	41
2.3.3. Cybersecurity in smart cities . . . . .	41
2.3.4. Public safety and emergency response . . . . .	42
2.3.5. Smart energy systems . . . . .	42
2.3.6. Future of technology in smart cities . . . . .	42
2.4. Case study: smart city implementation . . . . .	43
2.4.1. Singapore: a model of smart city innovation . . . . .	43
2.4.2. The role of AI in traffic management . . . . .	43
2.4.3. Real-time traffic monitoring . . . . .	43
2.4.4. Predictive analytics for traffic flow . . . . .	44
2.4.5. Public transportation and AI integration . . . . .	44
2.4.6. Autonomous vehicles: the future of Singapore's transport . . . . .	44

---

2.4.7. IoT and environmental monitoring. . . . .	45
2.4.8. AI in healthcare: revolutionizing public health . . . . .	45
2.4.9. IoMT in patient monitoring . . . . .	46
2.4.10. AI and predictive healthcare. . . . .	46
2.4.11. Telemedicine and AI-driven diagnosis . . . . .	46
2.4.12. AI in public health surveillance. . . . .	47
2.4.13. Digital twins for city planning . . . . .	47
2.4.14. Waste management through smart technology . . . . .	47
2.4.15. Smart energy management in Singapore . . . . .	48
2.4.16. Water management and AI-driven solutions . . . . .	48
2.4.17. Public safety and AI surveillance systems . . . . .	48
2.4.18. Smart buildings for energy efficiency . . . . .	49
2.5. Challenges in adopting smart cities. . . . .	51
2.5.1. High initial costs and investment hurdles. . . . .	51
2.5.2. Data privacy and security concerns . . . . .	51
2.5.3. Technological infrastructure gaps . . . . .	51
2.5.4. Fragmented governance and policy issues . . . . .	52
2.5.5. Integration with legacy systems . . . . .	52
2.5.6. Lack of technical expertise . . . . .	53
2.5.7. Social and cultural barriers . . . . .	53
2.5.8. Environmental and sustainability concerns . . . . .	54
2.5.9. Political and legal challenges . . . . .	54
2.5.10. Ethical considerations in AI and surveillance . . . . .	55
2.6. Research directions . . . . .	56
2.6.1. AI for predictive urban analytics . . . . .	56
2.6.2. Sustainability and smart energy grids . . . . .	57
2.6.3. Public–private partnerships in smart city development. . . . .	57
2.6.4. Ethical AI in smart cities . . . . .	57
2.6.5. AI and public transportation optimization . . . . .	58
2.6.6. Data-driven decision-making in urban governance . . . . .	59
2.6.7. AI in emergency services and disaster response. . . . .	59
2.6.8. Urban air quality management with IoT and AI . . . . .	59
2.7. Conclusion . . . . .	61
2.8. References . . . . .	63
<b>Chapter 3. IoT-Based Simulation for Emergency Vehicle Corridor for Smart Cities . . . . .</b>	<b>65</b>
Himanshu DIDEN, Hriday CHAWLA, Yashvi SIKKA, Misha KAKKAR and Deepki MEHROTRA	
3.1. Introduction. . . . .	65
3.2. Literature review. . . . .	66

3.3. Methodology . . . . .	70
3.3.1. Dataset used . . . . .	70
3.3.2. Proposed solution . . . . .	70
3.3.3. Detection phase . . . . .	72
3.3.4. Regulation phase . . . . .	75
3.4. Results and discussion . . . . .	76
3.4.1. Phase 1: detection of ambulances . . . . .	76
3.4.2. Phase 2: representation of traffic signals at a crossing . . . . .	77
3.4.3. Regular traffic cycle . . . . .	78
3.4.4. Traffic light during ambulance detection . . . . .	78
3.5. Conclusion . . . . .	79
3.6. References . . . . .	79
 <b>Chapter 4. Smart Waste Collection System . . . . .</b>	 83
Sumathi PAWAR, Ankitha KESHAV, Vandana BELENJI SANJEEVA and Rajermani THINAKARAN	
4.1. Introduction . . . . .	84
4.1.1. Key components . . . . .	85
4.1.2. Advantages of smart garbage systems. . . . .	87
4.1.3. Bottlenecks to adoption . . . . .	88
4.1.4. Case studies . . . . .	88
4.1.5. Applications . . . . .	89
4.1.6. Challenges . . . . .	89
4.2. Related work . . . . .	89
4.3. Methodology . . . . .	93
4.3.1. Architecture of the system. . . . .	94
4.3.2. Components required . . . . .	95
4.4. Results. . . . .	96
4.5. Analysis . . . . .	97
4.6. Conclusions and future work . . . . .	99
4.7. References . . . . .	99
 <b>Chapter 5. A Survey on AI Algorithms and Techniques for Developing Intelligent and Sustainable Cities . . . . .</b>	 103
Elumalai RAJALAKSHMI and M. SHOBANA	
5.1. Introduction . . . . .	104
5.1.1. Understanding the need for sustainable and intelligent cities . . . . .	104
5.1.2. Key AI techniques and algorithms . . . . .	105

---

5.2. Artificial intelligence uses for sustainable urban development . . . . .	107
5.2.1. Intelligent traffic management . . . . .	107
5.2.2. Energy efficiency . . . . .	108
5.2.3. Waste management . . . . .	108
5.2.4. Public safety . . . . .	108
5.2.5. Urban mobility and dynamics . . . . .	109
5.3. Advanced analytical techniques . . . . .	109
5.3.1. Leveraging AI for sustainable urban development: key research insights . . . . .	110
5.3.2. Anomaly detection in energy consumption . . . . .	112
5.3.3. Urban sustainability through air quality prediction . . . . .	112
5.3.4. Crowdsourcing logistics optimization . . . . .	112
5.3.5. Advanced anomaly detection for urban safety . . . . .	113
5.3.6. Innovative techniques in image classification . . . . .	113
5.3.7. Healthcare predictive modeling . . . . .	113
5.3.8. Cybersecurity in urban environments . . . . .	113
5.4. Advancements in intelligent solutions for sustainable urban development . . . . .	114
5.4.1. Taxi passenger hot spot identification . . . . .	114
5.4.2. Object contour recognition . . . . .	115
5.4.3. Freshwater ecosystem optimization . . . . .	115
5.4.4. Freeway incident duration prediction . . . . .	115
5.5. Conclusion . . . . .	119
5.6. Future directions . . . . .	119
5.7. References . . . . .	120
<b>Chapter 6. Machine Learning-based Approaches for Energy Management and Optimization for Smart Cities . . . . .</b>	<b>123</b>
Anil SHARMA, Tushar PANT, Suresh KUMAR and Pawan KUMAR	
6.1. Introduction . . . . .	124
6.1.1. Smart energy management systems . . . . .	125
6.1.2. Artificial intelligence and ML applications in SGs . . . . .	127
6.1.3. Cloud computing and IoT integration for energy management . . . . .	128
6.2. Literature review . . . . .	130
6.2.1. Smart meters in energy management . . . . .	131
6.2.2. Cloud computing . . . . .	131
6.2.3. Artificial intelligence and machine learning . . . . .	132
6.2.4. Internet of Things . . . . .	134
6.2.5. Communication technologies (ZigBee, Wi-Fi, WiMAX) . . . . .	135
6.2.6. Renewable energy integration . . . . .	135
6.2.7. Smart homes and buildings . . . . .	136

6.3. Discussion . . . . .	137
6.4. Conclusion . . . . .	139
6.5. Future work . . . . .	140
6.5.1. Enhanced AI and machine learning models . . . . .	140
6.5.2. Integration with renewable energy sources . . . . .	141
6.5.3. Cybersecurity and privacy . . . . .	141
6.5.4. Scalability and interoperability of IoT systems . . . . .	142
6.5.5. Smart grids and decentralized energy management . . . . .	142
6.5.6. Human-centric energy management . . . . .	142
6.6. References . . . . .	143
 <b>Chapter 7. Analyzing Accessible Learning Using Summarization for Communities . . . . .</b>	 147
Misha KAKKAR, Anuranjana SHARMA and Jeteish Pratap SINGH	
7.1. Introduction . . . . .	147
7.2. Literature review . . . . .	148
7.3. Proposed solution . . . . .	151
7.4. Results and discussion . . . . .	152
7.5. Conclusion . . . . .	153
7.6. Future scope . . . . .	153
7.7. References . . . . .	154
 <b>Chapter 8. Ranking of Smart Cities in India: IF-MOORA Approach . . . . .</b>	 157
Renuka NAGPAL, Deepti MEHROTRA and Rajni SEHGAL	
8.1. Introduction . . . . .	158
8.2. Literature review . . . . .	160
8.3. IF-MOORA method . . . . .	164
8.4. Results and discussion . . . . .	168
8.4.1. Process of selecting smart cities . . . . .	168
8.4.2. Process of selecting the criteria . . . . .	170
8.4.3. Selection of DM . . . . .	172
8.4.4. Perform process of application of IF-MOORA . . . . .	172
8.5. Conclusion . . . . .	178
8.6. References . . . . .	179
 <b>List of Authors . . . . .</b>	 183
 <b>Index . . . . .</b>	 187
