<b>Preface . . . . .</b>	<b>xi</b>
<b>Acknowledgments . . . . .</b>	<b>xv</b>
<b>Chapter 1. General Information on Marine Radioecology and on Risk Assessment . . . . .</b>	<b>1</b>
1.1. General information on radioecology . . . . .	1
1.1.1. History of radioecology . . . . .	2
1.1.2. The main marine radioecology laboratories . . . . .	3
1.1.3. The triad of radioecology: exposure, bioaccumulation and adverse effect. . . . .	4
1.2. The principle of risk assessment . . . . .	7
1.3. The particular case of the risk linked to ionizing radiation. . . . .	11
<b>Chapter 2. The Origins of Radionuclides in Marine Environments . . . . .</b>	<b>13</b>
2.1. Natural or anthropogenic origins of radionuclides in the marine environment.	13
2.2. The natural origins of radionuclides . . . . .	15
2.3. The military origins of anthropogenic radionuclides . . . . .	17
2.3.1. Radionuclides due to atmospheric fallout from atomic device explosions.	18
2.3.2. Direct releases of radionuclides from nuclear deterrence activities. . . . .	25
2.3.3. Indirect releases of radionuclides due to nuclear deterrence activities . . . . .	26
2.4. Civilian origins of anthropogenic radionuclides related to the nuclear fuel cycle	27
2.4.1. Uranium mines and nuclear fuel fabrication plants . . . . .	28
2.4.2. The use of nuclear fuel . . . . .	29
2.4.3. Spent fuel reprocessing plants . . . . .	32
2.5. The origins of anthropogenic radionuclides linked to accidents . . . . .	35
2.5.1. The Thule accident . . . . .	37
2.5.2. Releases due to submarine accidents . . . . .	37
2.5.3. The Chernobyl accident . . . . .	37

---

2.5.4. The Fukushima accident . . . . .	38
2.6. Indirect anthropogenic origins due to rivers and groundwater . . . . .	40
2.7. Anthropogenic origins of radioactive waste . . . . .	41
2.8. Conclusion . . . . .	43
<b>Chapter 3. The Fate of Radionuclides in the Marine Environment . . . . .</b>	<b>47</b>
3.1. The introduction of radionuclides into the marine environment . . . . .	47
3.1.1. Diffuse or limited, chronic or intermittent introduction of radionuclides into the marine environment . . . . .	47
3.1.2. Chemical speciation of radionuclides during their introduction into the environment . . . . .	47
3.2. The behavior of radionuclides in the marine environment . . . . .	48
3.2.1. Conservative and non-conservative radionuclides . . . . .	48
3.2.2. The distribution coefficient $K_d$ . . . . .	49
3.2.3. Factors influencing $K_d$ . . . . .	51
3.2.4. Chemical speciation of radionuclides . . . . .	61
3.2.5. The physico-chemical behavior of radionuclides in marine waters . . . . .	63
3.3. Dispersion of radionuclides in marine waters . . . . .	67
3.3.1. The passage of radionuclides through estuaries . . . . .	67
3.3.2. Dispersion in marine waters . . . . .	71
3.4. Dispersion of radionuclides with marine sedimentary particles . . . . .	80
3.5. Conclusion . . . . .	81
<b>Chapter 4. The Fate of Radionuclides in the Marine Biosphere . . . . .</b>	<b>83</b>
4.1. Introduction . . . . .	83
4.2. Penetration pathways of radionuclides in living organisms . . . . .	84
4.2.1. Exposure pathways of flora and fauna . . . . .	84
4.2.2. Transmembrane passages . . . . .	84
4.2.3. Body distribution . . . . .	86
4.3. Radionuclide bioaccumulation mechanisms . . . . .	86
4.3.1. Accumulation mechanisms in plants . . . . .	87
4.3.2. Accumulation mechanisms in animals . . . . .	89
4.4. Influence of ecological factors on radioactive contamination . . . . .	93
4.4.1. Influence of abiotic factors on radioactive contamination of aquatic organisms . . . . .	94
4.4.2. Biological factors in the contamination of organisms . . . . .	99
4.4.3. Influence of living organisms on the cycle of radionuclides in the aquatic environment . . . . .	101
4.5. The organotropism of radionuclides . . . . .	106
4.6. The mechanisms for the chemical detoxification of radionuclides . . . . .	108
4.6.1. Chemical detoxification in animals: biomineralization and induction of metallothionein . . . . .	108

---

4.6.2. Storage forms and chemical speciation of radionuclides in organisms . . . . .	109
4.6.3. Influence of chemical speciation in the biota on trophic transfers . . . . .	110
4.7. Disposal of radionuclides . . . . .	111
4.8. Quantification of radionuclide transfers to organisms . . . . .	114
4.8.1. The various methodologies for estimating radionuclide transfers . . . . .	115
4.8.2. Transfer of radionuclides from water to organisms or bioconcentration . .	116
4.8.3. Transfer of radionuclides from sediment to benthic organisms . . . . .	120
4.8.4. Trophic transfers of radionuclides . . . . .	121
4.9. Conclusion . . . . .	130
<b>Chapter 5. Radioactive Contamination of the Marine Environment and Monitoring Programs . . . . .</b>	<b>135</b>
5.1. Introduction . . . . .	135
5.2. Radioactive contamination of marine environments . . . . .	136
5.2.1. Radioactive contamination by natural radionuclides . . . . .	136
5.2.2. The current state of radioactive contamination of the marine environment . . . . .	140
5.2.3. The marine sites of atmospheric atomic tests . . . . .	142
5.2.4. Sites affected by atmospheric deposition . . . . .	150
5.2.5. Sites contaminated by spent fuel reprocessing plants . . . . .	154
5.2.6. Sites affected by nuclear accidents . . . . .	159
5.2.7. Sites affected by submerged radioactive waste . . . . .	163
5.2.8. Sites with little impact from radioactive pollution . . . . .	164
5.3. Environmental radiological monitoring networks . . . . .	165
5.3.1. General information . . . . .	165
5.3.2. Environmental monitoring using bioaccumulators . . . . .	167
5.4. International and regional marine environmental monitoring networks . . . . .	170
5.4.1. The work of the IAEA in the field of the marine environment . . . . .	170
5.4.2. OSPAR radiological monitoring . . . . .	170
5.4.3. The northern sea networks . . . . .	172
5.5. Radiological monitoring in France . . . . .	173
5.5.1. Principles of control . . . . .	174
5.5.2. The IRSN monitoring network . . . . .	175
5.5.3. RNM ( <i>Réseau national de mesures de la radioactivité de l'environnement</i> ) . . . . .	176
5.6. Conclusion . . . . .	177
<b>Chapter 6. Radiation Doses Received by Marine Organisms . . . . .</b>	<b>179</b>
6.1. Introduction . . . . .	179
6.2. Methodologies for estimating the dose given to marine organisms . . . . .	179
6.2.1. The units of radiation doses . . . . .	181
6.2.2. The difficulties of estimating the radiation dose . . . . .	182

---

6.3. Examples of natural radiation doses to marine organisms . . . . .	182
6.3.1. Pelagic marine organisms . . . . .	184
6.3.2. Benthic marine organisms . . . . .	185
6.3.3. Deep-sea marine organisms and hydrothermal sources . . . . .	185
6.4. Examples of anthropogenic radiation doses to organisms . . . . .	186
6.4.1. Irradiation doses resulting from the testing of atomic bombs . . . . .	186
6.4.2. Radiation doses resulting from nuclear accidents . . . . .	187
6.4.3. Irradiation dose from spent fuel reprocessing plants . . . . .	190
6.4.4. Radiation dose from oil and gas operations . . . . .	191
6.4.5. Irradiation dose due to experimental contamination . . . . .	192
6.5. The ICRP approach . . . . .	193
6.5.1. Reference organisms (RAP, Reference Animal or Plant) . . . . .	193
6.5.2. Limitations of the methodology . . . . .	194
6.5.3. Towards essential improvements . . . . .	195
6.6. Systematic underestimation of the dose received by organisms . . . . .	197
6.7. Conclusion . . . . .	198
<b>Chapter 7. Effects of Irradiation on Marine Organisms . . . . .</b>	<b>199</b>
7.1. General information on the effects of irradiation . . . . .	199
7.1.1. Modes of action of ionizing radiation . . . . .	199
7.1.2. Deterministic and stochastic effects . . . . .	200
7.2. Effects of ionizing radiation at the molecular level . . . . .	201
7.2.1. Effects on DNA . . . . .	201
7.2.2. Induction of cytogenetic and genetic effects . . . . .	204
7.2.3. Effects on other biomolecules . . . . .	205
7.3. Effects of irradiation at the subcellular and cellular levels . . . . .	206
7.3.1. Physical alterations of chromosome structure . . . . .	206
7.3.2. Histopathological changes . . . . .	207
7.3.3. Induction of defense and damage biomarkers . . . . .	208
7.4. Effects of irradiation on individuals . . . . .	208
7.4.1. Mortality . . . . .	210
7.4.2. Alteration of reproduction . . . . .	212
7.4.3. Influence of the vital stage . . . . .	219
7.4.4. Radiosensitivity and radioresistance of organisms . . . . .	221
7.4.5. Conclusions on the effects of irradiation at the individual level . . . . .	223
7.5. Ecological community effects of irradiation . . . . .	223
7.5.1. Monitoring of highly contaminated areas . . . . .	224
7.5.2. Partial conclusions . . . . .	225
7.6. Confounding factors on the effects of irradiation . . . . .	225
7.7. Systematic under-evaluation of the biological effects of ionizing radiation . . . . .	228
7.7.1. Harmfulness according to life stage . . . . .	228
7.7.2. Harmfulness by tissue or organ . . . . .	228

---

---

7.7.3. Harmfulness according to emitters . . . . .	228
7.7.4. Not taking into account the bystander effect . . . . .	228
7.7.5. Failure to take into account the interactions between the effects of radionuclides . . . . .	229
7.7.6. Failure to take into account biodiversity in the marine environment . . . . .	229
7.8. Conclusion . . . . .	229
<b>Chapter 8. Characterization of Radioactive Risk in Marine Organisms . . . . .</b>	233
8.1. The principle of radioactive risk characterization. . . . .	233
8.1.1. International organizations involved in radioactive risk assessment . . . . .	234
8.1.2. European research . . . . .	235
8.2. Methods for selecting reference values . . . . .	236
8.2.1. The ICRP approach. . . . .	236
8.2.2. The ERICA approach. . . . .	236
8.3. Tools for assessing radioactive risk to non-human organisms. . . . .	237
8.3.1. The ERICA tool. . . . .	237
8.3.2. The FASSET database . . . . .	238
8.4. Recommendations of radiation doses for marine organisms . . . . .	239
8.5. Applications and feedback . . . . .	241
8.6. Gaps in the characterization of radioactive risk . . . . .	243
8.6.1. Position of international organizations with respect to the ICRP approach	243
8.6.2. Transgenerational effects. . . . .	243
8.6.3. Ignorance of biodiversity. . . . .	244
8.6.4. The choice of the threshold adverse effect . . . . .	244
8.7. Conclusion . . . . .	245
<b>Conclusion . . . . .</b>	247
<b>List of Acronyms . . . . .</b>	257
<b>References . . . . .</b>	261
<b>Index . . . . .</b>	311
