Introduction	xi
Bernard DEBARBIEUX and Irène HIRT	
Chapter 1. The Map as a Legitimate Space: Cartography as a Language, a Stage and an Issue	1
Jacques LÉVY	
1.1. Introduction.	1
1.2. Map truth regimes	3
1.3. The new spaces of the electoral map	6
1.4. Cartographic turn, geographic turn and political space	13
1.5. Ethical turn and mapping.	16
1.6. Mapping, citizen science	18
1.7. References	22
Chapter 2. Cartography and Spatial Production of Society	25
Franco FARINELLI	
2.1. The map, politics and morality	25
2.2. The map, territory and globe.	28
2.3. The map, order and modernity	31
2.4. The map, reason and rhetoric...	35
2.5. The map, constraint and the self-organization...	39
2.6. The map, production and society	40
2.7. References	43

Chapter 3. Farewell to Maps: Reformulating Critical Cartography in the Digital Age	47
Pierre GAUTREAU and Matthieu NOUCHER	
3.1. Introduction.	47
3.2. Farewell to maps: when the digital world disrupts the objects and questions of a research current	48
3.2.1. The main issues of conventional critical mapping	48
3.2.2. What the digital world does to critical mapping: Russian doll-like difficulties	50
3.2.3. Methods maladapted to digital technology changes	54
3.3. The shortcomings of critical mapping exacerbated by digital technology	55
3.3.1. The “Harlesian” of reflections on the finished product	55
3.3.2. The taste for successful maps	56
3.3.3. A taste for great narratives.	58
3.4. Reformulating critical mapping in the digital age	58
3.4.1. Three priority disciplinary alliances	59
3.4.2. Making political sense of what does not work: investigating “maps for nothing” in the digital age	60
3.4.3. The political meaning of cartographic modesty: what do the “small maps of the Web” tell us?	62
3.4.4. Circulation and policy	63
3.5. Conclusion	65
3.6. References	65
Chapter 4. Mapping and Participation in the <i>topos</i> and <i>chora</i> Test	69
Federica BURINI	
4.1. Introduction.	69
4.2. Participatory mapping tested by <i>topos</i> and <i>chora</i>	70
4.3. Toward a reflective approach to participatory mapping.	71
4.4. From solicited mapping to collaborative systems and digital traces.	72
4.5. The new boundaries of collaborative mapping systems produced by geolocation technologies.	75
4.6. Representing the spatiotemporal dimension of urban mobility using data produced by inhabitants.	76
4.7. Toward a reflective and chorographic approach to collaborative mapping systems	78

4.7.1. Solicited mapping systems with active participation	80
4.7.2. Voluntary and participatory mapping systems	83
4.7.3. Derivative and passive participatory map systems	85
4.8. Conclusion	86
4.9. References	87
Chapter 5. The Cartographic Factory of Modern States	91
Bernard DEBARBIEUX	
5.1. Introduction.	91
5.2. The invention of spatial modernity in the Renaissance	92
5.3. State imaginaries of space and territory	93
5.4. The construction of the nation-state through the map	103
5.5. The colonial adventure: a counter-illustration?	110
5.6. Maps and the government of things and people	113
5.7. Current state of the issue	118
5.8. References	119
Chapter 6. Statistical Cartography and International Governance in the Age of Big Data	127
Hy DAO	
6.1. Introduction.	127
6.2. Birth and internationalization of statistical cartography.	128
6.3. International statistical mapping	129
6.3.1. Statistics and mapping by international organizations	129
6.3.2. Coordination of statistical and geographical information	132
6.3.3. Is the aggregation of national data outdated?	133
6.4. Cartography in the digital age	134
6.4.1. Computerization and dissemination of cartographic resources	134
6.4.2. A global information space based on the Web and Big Data	136
6.5. Mapping the SDGs	142
6.5.1. A set of non-binding targets for 2030	142
6.5.2. Governance of the SDG indicators	142
6.5.3. Information coverage of the SDGs	143
6.5.4. Cartographic visualizations of the SDGs	144
6.5.5. The SDG indicator process challenged by Big Data	146
6.6. (Re)configurations of international cartography	147
6.6.1. From the visual paradigm to the datamatic paradigm	147

6.6.2. Informational alignments	148
6.6.3. Political alignments.	150
6.7. Conclusion	150
6.8. References	151
Chapter 7. Indigenous Mapping: Reclaiming Territories, Decolonizing Knowledge	155
Irène HIRT	
7.1. Introduction.	155
7.2. Conceptual and theoretical milestones	157
7.2.1. Indigenous counter-mapping: a struggle for concrete and symbolic spaces	157
7.2.2. Indigenous mapping as a field of academic thinking	161
7.3. Using maps to claim rights and reclaim territories	163
7.3.1. Brief history of the political use of maps	163
7.3.2. Indigenous mapping in the Americas: similarities and differences between North and South	164
7.3.3. The aporias of the “cartographic-legal strategy”.	168
7.3.4. Controlling the flow of geographic information	170
7.3.5. The ambiguous role of the digital giants	171
7.4. Decolonizing maps and cartography	172
7.4.1. Toward an inclusive definition of maps.	172
7.4.2. “Reconstructing” maps.	174
7.4.3. Representing “Indigenous depth of place”	175
7.5. Conclusion	178
7.6. References	179
Chapter 8. Chorematic Representations in Participatory Processes of Territorial Projects	187
Sylvie LARDON	
8.1. Introduction.	187
8.2. Methodological choices	189
8.3. Three illustrations of the use of choremes in territorial projects	190
8.3.1. The Pikogan forest in Quebec or choremes for communicating	190
8.3.2. The Western Pacific Islands or the choremes for integrating the issues.	192
8.3.3. The gardens of the Billom area in France or the choremes for acting.	195

8.4. How can we evaluate this co-construction of territories?	197
8.5. References	199
Chapter 9. National Territorial Prospective Maps	201
Anne BAILLY	
9.1. Introduction.	201
9.2. DATAR, foresight and mapping	201
9.3. The Paris Basin White Paper	203
9.3.1. Cartographic design	205
9.3.2. The graphic vocabulary	205
9.3.3. Translating, visualizing and expressing intentions	206
9.4. The first maps of the great national debate on regional planning	207
9.5. France in 2015	210
9.6. France in 2020	212
9.6.1. Three “deterrent” scenarios	213
9.6.2. The “connected polycentrism” scenario.	213
9.7. Lessons from a wealth of experience.	215
9.8. References	215
Chapter 10. Making Maps to Fight Unjust Migration Policies	217
Olivier CLOCHARD	
10.1. Introduction	217
10.2. Actors and objectives of cartographic productions	218
10.2.1. From respect to emancipation of semiological conventions	218
10.2.2. The two network compasses.	223
10.3. Mapping experiments undertaken	225
10.3.1. Carrying knowledge and claims.	225
10.3.2. New modes of representation	228
10.3.3. The words on the maps are also important	229
10.3.4. The issue of esthetics	232
10.4. Conclusion	234
10.5. References.	234
