<b>Foreword: The Knowledge Community at the Service of Communities</b> . . . . .	xi
Arnaud MACÉ	
<b>Preface</b> . . . . .	xix
Patrick GIRAUDOUX	
<b>Chapter 1. Agricultural Changes and Population Outbreaks of Grassland Voles</b> . . . . .	1
Patrick GIRAUDOUX	
1.1. Introduction. . . . .	2
1.2. The European Common Agricultural Policy and its national implementation, voles and their predators . . . . .	4
1.2.1. Establishment of practices and landscape. . . . .	4
1.2.2. Which measurement tools for which observations? . . . . .	6
1.2.3. Landscapes and practices . . . . .	7
1.2.4. Synchronies . . . . .	10
1.2.5. Predation . . . . .	12
1.2.6. Bacteria and other vole parasites . . . . .	16
1.3. Controlling outbreaks and their consequences: from correlations to action. . . . .	18
1.3.1. Rodenticide treatments as a quasi-experiment . . . . .	18
1.3.2. The toolkit . . . . .	20
1.3.3. Anthropology to the rescue of the application . . . . .	25

1.3.4. The status and contribution of models . . . . .	28
1.3.5. Conceptual models . . . . .	28
1.3.6. Quantitative models . . . . .	30
1.3.7. Toward new questions . . . . .	33
1.4. What methodological lessons can be drawn from this experience? . . .	35
1.5. Acknowledgments . . . . .	43
1.6. References . . . . .	43
<b>Chapter 2. The Pollution of a River: A Sociological Investigation of Knowledge and Expertise.</b> . . . . .	51
Simon CALLA	
2.1. Introduction. . . . .	51
2.2. Different types of knowledge to qualify the situation . . . . .	55
2.2.1. At the water's edge, indexical knowledge . . . . .	55
2.2.2. In the laboratories, scientific knowledge . . . . .	60
2.2.3. In the administrations, legal knowledge. . . . .	65
2.3. Several groups of scientists investigating the same situation. . . . .	70
2.3.1. The construction of the content of expert reports . . . . .	70
2.3.2. The cohabitation of two groups of experts . . . . .	73
2.3.3. River advocates and experts. . . . .	76
2.4. Conclusion . . . . .	81
2.5. References . . . . .	83
<b>Chapter 3. Farm Environment, Raw Milk and Immunity: A "Field" Study of Tolerance Learning</b> . . . . .	87
Dominique Angèle VUITTON, Jean-Jacques LAPLANTE and Amandine DIVARET-CHAUVEAU	
3.1. Introduction: from farm disease to farm protection, a rural environmental story. . . . .	88
3.2. Atopic allergic diseases: multifactorial, multidisciplinary and, paradoxically, not very rural . . . . .	90
3.3. The increasing prevalence of atopic allergic diseases in the population of developed countries: an enigma of the second half of the 20th century . . . . .	92
3.4. The role of the farm environment in protecting children from atopic allergic diseases . . . . .	96
3.4.1. Observations from cross-sectional epidemiological studies . . . .	96
3.4.2. Farm life: a protective factor against the occurrence of allergic diseases? . . . . .	98

3.5. Setting up the PASTURE cohort in Germany, Austria, Finland, Switzerland and Franche-Comté. . . . .	102
3.5.1. Protection against allergic diseases by the farm environment: a confirmation . . . . .	107
3.5.2. Exposure to animals and the farm microbial ecosystem . . . . .	108
3.5.3. Consumption of raw milk and dairy products and exposure to the microbial ecosystem of raw milk . . . . .	112
3.5.4. Dietary diversification in the first year of life and cheese consumption . . . . .	116
3.6. At the crossroads: assessment and avenues still to be explored by the PASTURE cohort. . . . .	117
3.6.1. The scientific achievements of nearly 20 years of the PASTURE adventure . . . . .	118
3.6.2. Intestinal microbiota: the missing link? First results from the PASTURE study. . . . .	119
3.6.3. Debates on the “benefit-risk” ratio and the possible contribution of the human and social sciences. . . . .	120
3.7. Acknowledgments . . . . .	125
3.8. References . . . . .	126

#### **Chapter 4. Ecology of *Echinococcus multilocularis***

<b>Transmission</b> . . . . .	137
Patrick GIRAUDOUX, Dominique Angèle VUITTON and Philip Simon CRAIG	
4.1. Introduction. . . . .	138
4.2. The Jura transmission system . . . . .	140
4.2.1. Seasonality and microfoci in rodents . . . . .	140
4.2.2. Vole outbreaks and distribution of human cases. . . . .	142
4.2.3. Infection in definitive hosts . . . . .	143
4.2.4. Conclusion . . . . .	145
4.3. Ecology of <i>Echinococcus multilocularis</i> transmission in China and Kyrgyzstan. . . . .	146
4.3.1. The background . . . . .	146
4.3.2. Transmission and biodiversity on a continental scale. . . . .	148
4.3.3. The Tibetan plateau. . . . .	150
4.4. The mountains of southern Gansu and Ningxia. . . . .	155
4.4.1. Gansu . . . . .	155
4.4.2. Ningxia . . . . .	162
4.5. Alpine meadows from Altai to Pamir . . . . .	164
4.6. Conclusion . . . . .	165

4.7. Acknowledgment . . . . .	172
4.8. References . . . . .	172
<b>Chapter 5. “Indigenous” Views of the Disease and Risks Associated with Alveolar Echinococcosis . . . . .</b>	<b>181</b>
Dominique JACQUES-JOUVENOT	
5.1. Introduction. . . . .	181
5.2. Building scientific cooperation . . . . .	184
5.3. Collaborating: working with others. . . . .	186
5.4. Indigenous visions of social reality . . . . .	189
5.5. Lessons learned allow us to think differently about prevention . . . . .	192
5.6. Proximity to a sick person reinforces preventive behavior . . . . .	195
5.7. References . . . . .	198
<b>Chapter 6. Conservation of the Black-and-White Snub-nosed Monkey . . . . .</b>	<b>201</b>
Eve AFONSO, Cécile CALLOU, Céline CLAUZEL, Patrick GIRAUDOUX and Li LI	
6.1. Introduction. . . . .	201
6.2. Historical context and issues. . . . .	202
6.3. Habitat connectivity and population genetics . . . . .	207
6.4. In search of lost place names . . . . .	213
6.5. Animal tourism: what are the consequences for the black-and-white snub-nosed monkey? . . . . .	219
6.5.1. Ecotourism feeding sites: ready-to-see animals . . . . .	220
6.5.2. Ecotourism in Xiangguqing: what are the consequences for the black-and-white snub-nosed monkey? . . . . .	221
6.5.3. Genetic consequences of human intervention . . . . .	223
6.5.4. Feeding sites: hotspots of parasitic transmission? . . . . .	226
6.6. References . . . . .	230
<b>Chapter 7. Cholera in Africa, from Fatalism to the Hope of Elimination: The Story of the Revolt Against a <i>Status Quo</i>. . . . .</b>	<b>235</b>
Didier BOMPANGUE	
7.1. How can we engage in a collective approach to action research in health? . . . . .	236

---

7.2. The first years of the fight against cholera and the disillusionment of humanitarianism . . . . .	241
7.3. From unpredictable to predictable cholera. . . . .	251
7.3.1. A metapopulation mode of operation linked to the Great Lakes . . . . .	255
7.3.2. Seasonality of cholera epidemics in lake areas. . . . .	257
7.3.3. The role of lake areas in the persistence of cholera epidemics . . . . .	260
7.3.4. Other determinants . . . . .	262
7.3.5. The other face of cholera . . . . .	264
7.4. Toward the elimination of cholera and the discovery of governance issues . . . . .	265
7.5. References . . . . .	271
<b>Conclusion: Cooperation at Work: Sociology of a Scientific Standpoint . . . . .</b>	<b>273</b>
Dominique JACQUES-JOUVENOT and Simon CALLA	
<b>List of Authors . . . . .</b>	<b>295</b>
<b>Index . . . . .</b>	<b>297</b>
