Introduction	xiii
Isabelle LIOTARD, Valérie REVEST and Audrey VÉZIAN	
Chapter 1. From Crowdsourcing to Inclusiveness: The European Experience of Innovation Contests	1
Isabelle LIOTARD and Valérie REVEST	
1.1. Open innovation and crowdsourcing: two closely related phenomena	3
1.2. Platforms, innovation contests and inclusiveness or how to better articulate innovation and society?	5
1.3. The European context: a proactive approach to open innovation	10
1.4. European contests and inclusiveness: two case studies	12
1.4.1. Blockchain for social goods (BCSG): a step towards greater inclusiveness?	14
1.4.2. Affordable High-Tech for Humanitarian Aid (AHTHA): an attempt to increase cooperation?	19
1.5. Discussion and conclusion	22
1.5.1. Contests and mechanisms of co-production of knowledge.	23
1.5.2. A reflection on communities of innovation.	24
1.6. Acknowledgments.	27
1.7. References	27

Chapter 2. The Regulation of Public Data: The Difficult Case of the Health Sector	35
Audrey VÉZIAN	
2.1. Tenfold attraction for health data, new digitized tools: towards truly innovative practices?	39
2.1.1. A constant quest for data	39
2.1.2. Health data with an increasingly broad scope	40
2.1.3. Health data used to serve a reform rhetoric that is not very innovative	41
2.2. Towards an economic valuation of health data in the name of a sovereignty imperative	44
2.2.1. Public action and data representation as an economic issue	45
2.2.2. Towards public–private co-regulation of health data	49
2.3. A contested regulatory vision	61
2.3.1. A complex health system	61
2.3.2. Interministerial rivalries	64
2.3.3. A professional sector under tension	67
2.4. Conclusion	69
2.5. References	70
Chapter 3. Access Policies to Digital Resources of Administration through the Lens of Microsimulation	73
Franck BESSIS and Paul COTTON	
3.1. From a circumvented closure to a progressive and non-systematic opening of data (1951–2001)	78
3.1.1. Outside of the administration, researchers who manage to access data in an “informal” way	78
3.1.2. Incomplete access: the decisive advantage of “Administrative Economists”	82
3.2. The movement to open up at the turn of the 2010s: from retreat to institutional change	86
3.2.1. Fiscal revolution and statistical counter-revolution: a movement to close the data	86
3.2.2. From a relationship of distrust to one of trust: the IPP and the LPR/Lemaire law (2011–2016)	88
3.3. The movement to open up codes: free consent versus forced freedom	90
3.3.1. The first steps of an “open source” culture within the administration	91
3.3.2. Forced openness: the administration ordered to communicate or open up the codes of its microsimulation models	94

3.4. Discussion: different conceptions of opening up quality?	101
3.5. References	107
Chapter 4. How to Characterize Public Innovation Platforms? Crossed Perspectives	111
Isabelle LIOTARD, Valérie REVEST and Claudine GAY	
4.1. Platforms in economics and management	113
4.1.1. From the platform to the digital platform: definitions and characteristics	113
4.1.2. Digital platform and a two-sided market	116
4.2. From innovation intermediation platforms (IIPs) to public innovation intermediation platforms (PIIPs)	120
4.2.1. Innocentive, a private intermediary innovation platform.	121
4.2.2. Challenge.Gov, an innovation intermediary government platform	123
4.2.3. First conceptualization of public innovation intermediation platforms (PIIPs)	126
4.3. The contribution of engineering sciences to the analysis of PIIPs: some directions to explore.	130
4.3.1. The contributions of a process approach	131
4.3.2. The Open Innovation Platform (OIP): from a characterization in technical terms.	132
4.3.3. ... to a vision in terms of modularity and lifecycle	133
4.4. Discussion and conclusion	137
4.5. Acknowledgments.	141
4.6. References	141
Conclusion	147
Paul COTTON, Isabelle LIOTARD and Valérie REVEST
