Introduction	ix
Jean-Pierre MIGNOT and Marc MÉQUIGNON	
Chapter 1. Morpho-Sociological Approach to the City	1
Marc MÉQUIGNON and Patrizia LAUDATI	
1.1. Introduction: socio-morphological analysis as a tool for understanding the city	1
1.2. The city's modes of production.	3
1.2.1. Combining different modes	7
1.2.2. Urban sprawl and morphological changes	8
1.3. Difficulties of apprehension	11
1.4. The city: object or subject?	12
1.5. The shapes and form of the city	13
1.6. Representations of the city: "drawings and designs"	14
1.6.1. Drawings.	14
1.6.2. Designs	17
1.7. The constituent elements of the city	18
1.7.1. Limits	18
1.7.2. Structure	19
1.7.3. Layout	22
1.7.4. Plot division and private property	26
1.7.5. The city block	28
1.7.6. The street	34
1.7.7. The square	39
1.7.8. Unique elements	41
1.8. Conclusion	44
1.9. References	45

Chapter 2. Space, Production and Urban Forms 49

Jean-Pierre MIGNOT

2.1. General introduction	49
2.2. The city between space and time	51
2.2.1. Back to the concept of space	52
2.2.2. Produced urban space and social production	63
2.2.3. Mode of production, production relationships and urban composition: the weight of history	67
2.3. Forms of accumulation and urban forms	71
2.3.1. Capitalism, regulation and the regime of accumulation	71
2.3.2. Fordist accumulation and urban growth	76
2.3.3. Digitization and service accumulation	83
2.4. Urban space, environment and resilience	91
2.4.1. Demography and urbanization: a major challenge for the environment	94
2.4.2. From the Fordist city to the sustainable city: a gamble?	102
2.4.3. Cities and resilience	107
2.5. The city under the regime of service accumulation	111
2.5.1. From the center to the periphery or the peripheral expansion of commerce	112
2.5.2. Smart city and sustainable city	115
2.6. A provisional conclusion	123
2.7. References	124

Chapter 3. A Territorial Approach to Urban Spaces between Sustainability and Liveability 129

Fabrice ESCAFFRE, Mélanie GAMBINO and Sinda HAOUËS-JOUVE

3.1. Urban diversification and transformation	131
3.1.1. The criteria for necessary urban differentiation	132
3.1.2. Urbanization as a global phenomenon	134
3.2. The urban issue through the prism of housing	137
3.2.1. Urban housing in transformation	137
3.2.2. Housing policies in question	139
3.3. Urban spaces and mobilities	144
3.3.1. Residential mobility	144
3.3.2. Daily and leisure urban mobility	146
3.4. An urban agriculture	150
3.4.1. Multifunctional urban agriculture	152
3.4.2. ... But a diversified agriculture	154
3.4.3. Six types of urban agriculture activities	155
3.4.4. The establishment of food governance	158
3.4.5. The sustainability challenges for urban agriculture	159

3.5. The interface between urban spaces and climate	160
3.5.1. The city and climate change	161
3.5.2. Mobility and buildings: prime urban targets for mitigation	164
3.5.3. The urban microclimate: a new challenge for urban livability	165
3.5.4. Putting the climate issue on the urban policy agenda	168
3.5.5. How does this translate into urban planning practices?	171
3.6. Conclusion	175
3.7. References	176
Chapter 4. The City: A Space for Tensions in Modernity	183
Yann FERGUSON	
4.1. Living together in urban societies	185
4.1.1. City dwellers: liberated, but with a weakened collective conscience.	186
4.1.2. The diversity of the urban population: a threat to the social connection?	192
4.1.3. Producing urban solidarity	196
4.2. The socio-spatial dynamics of the urban population	202
4.2.1. The fragmentation of urban society from above	202
4.2.2. The fragmentation of urban society from below	209
4.2.3. The disunity of the city	214
4.3. The city in search of sustainability	222
4.3.1. City and nature: an unlikely union.	223
4.3.2. The sustainable urban project: the city as a solution.	231
4.4. References	241
