

Contents

Chapter 1. A General Introduction to Historical Ecology	1
Guillaume DECOCQ	
1.1. The roots of historical ecology	2
1.2. A multidisciplinary approach of socio-ecosystems	3
1.3. Recent trends in historical ecology	4
1.4. The way forward.	6
1.5. References	7
Chapter 2. Historical Resurveys Reveal Causes of Long-term Ecological Change	11
Donald M. WALLER	
2.1. Serious ecological changes are pervasive	11
2.2. Anthropogenic drivers of ecological change	12
2.2.1. The missing baseline problem	12
2.2.2. Ecological communities are complex	13
2.3. Kinds of ecological change	14
2.3.1. Natural community dynamics	14
2.3.2. Anthropogenic drivers of ecological change	14
2.4. Understanding the forces driving ecological change	18
2.4.1. Natural experiments	18
2.4.2. Metrics of change	19
2.4.3. Can functional traits reveal drivers of change?.	19
2.4.4. Vectors of change – ordination	20
2.5. Conclusion	22
2.6. References	22

Chapter 3. Getting the Right Answer Can Take a While: Long-term Ecological Field Studies as Historical Ecology.	27
Frank S. GILLIAM	
3.1. Introduction	27
3.2. Fernow Experimental Forest	29
3.2.1. Background	29
3.2.2. Site description	30
3.2.3. Field design	30
3.3. Long-term studies at Fernow Experimental Forest, West Virginia	32
3.3.1. Effects of acidification on soil fertility and herb layer cover and foliar nutrients	32
3.3.2. Effects of N addition on soil N dynamics.	34
3.3.3. Effects of N addition on herb layer composition and diversity	35
3.3.4. The N homogeneity hypothesis	37
3.3.5. A look at the future: declines in the atmospheric deposition of N	40
3.4. Conclusion	40
3.5. References	41
Chapter 4. Gaps and Cracks in Land Cover Mapping for Historical Ecology	45
Francesca Di PIETRO, Roger COLY, Clémence CHAUDRON, Samuel LETURCQ	
4.1. Introduction	45
4.2. Three main steps of past land cover mapping	46
4.3. Land cover in the 19th century: the old cadasters.	47
4.4. Land cover in the 20th century: aerial photographs.	50
4.5. Present land cover: modern databases	52
4.6. From different sources to one land cover typology	53
4.7. Conclusion	55
4.8. References	55
Chapter 5. The Use of Repeat Photography in African Historical Ecology	57
Michael Timm HOFFMAN and Rick F. ROHDE	
5.1. Repeat photography as an emerging tool in African historical ecology.	57
5.2. Repeat photography and landscape change in Africa.	58
5.2.1. Early contributions	58
5.2.2. Ethiopia	58
5.2.3. Southern Africa	59
5.3. Long-term change in plant populations as revealed by repeat photography	62
5.4. Strengths and limitations	64
5.5. Future directions.	65
5.6. References	66

Chapter 6. Remote Sensing for Historical Ecology	71
Pierre-Alexis HERRAULT and David SHEEREN	
6.1. Introduction	71
6.2. Landscape spatio-temporal changes as a proxy of biodiversity	72
6.3. Mapping landscapes at different dates	73
6.3.1. Airborne laser scanning data	73
6.3.2. Historical maps	74
6.3.3. Old aerial photographs	75
6.3.4. Satellite images	76
6.4. Modeling the effects of spatio-temporal changes on present-day biodiversity	77
6.4.1. Structural spatio-temporal metrics	77
6.4.2. Functional spatio-temporal metrics	79
6.5. References	81
Chapter 7. Soil Archives: Where Soilscape History Meets Present-day Ecosystems	85
Boris BRASSEUR, Damien ERTLEN and Vincent ROBIN	
7.1. Introduction	85
7.2. Mechanisms of soil archiving and the associated dynamics	86
7.2.1. Pedoturbations of biological and physical origins	86
7.2.2. Eluviation–Illuviation	86
7.2.3. Anthropogenic factors	88
7.2.4. Effects of geomorphological processes on soil archives	88
7.3. Examples of soil archives and their influence on current ecosystems	90
7.3.1. Chemical archives, witnesses of progressive soil transformations	90
7.3.2. Physical archives: reading the soil pit profile and microtopographic features	92
7.3.3. Soil organic matter	93
7.3.4. Botanical remains	94
7.4. Conclusion	95
7.5. References	95
Chapter 8. Continuous and Nested Time in Historical Ecology: Application to Soil Studies	99
Damien ERTLEN	
8.1. Interdisciplinarity and time in historical ecology	99
8.2. Continuous time	100
8.3. Nested time	102
8.4. Different disciplines, different tools	103
8.5. Examples of nested and continuous time: soils and strata	105

8.6. Conclusion	107
8.7. References	108
Chapter 9. The Analysis of Relic Charcoal Kilns for the Assessment of Forest Trajectories	111
Vincent ROBIN, Alexa DUFRAISSE and Claudia OLIVEIRA	
9.1. Introduction	111
9.2. Looking at the platform of the kiln.	112
9.2.1. Looking at the dimensions of the kiln platforms	112
9.2.2. Platform inventory	113
9.3. Looking at the charcoal pieces	115
9.3.1. Sampling.	115
9.3.2. Taxonomic identification.	115
9.3.3. Dendro-anthracology	117
9.4. Looking at the ages	117
9.5. Conclusion	119
9.6. References	119
Chapter 10. Ancient Trees and Botanical Indicators as Evidence for Change and Continuity in Landscape Evolution	123
Ian D. ROTHERHAM	
10.1. Introduction	123
10.2. What is ancient woodland? Questions of woods versus old-growth forest, and of continuity versus antiquity	124
10.3. The value of ancient woods	124
10.4. Methodology	125
10.4.1. Evidencing ancient woodlands and the use of indicators.	125
10.4.2. Tree form and growth as evidence of antiquity and continuity	128
10.4.3. The importance of ancient and veteran trees in woodland	129
10.4.4. Soils and sediments	130
10.5. An emerging woodland paradigm.	131
10.6. A simple new conceptual framework.	131
10.7. Conclusion	133
10.8. References	133
Chapter 11. Towards a Methodological Framework for Investigating the Hidden History of Woodland Covers	135
Damien MARAGE, Catherine FRUCHART, Isabelle JOUFFROY-BAPICOT, Olivier GIRARDCLOS, Vincent BALLAND	
11.1. Why talk about hidden history when studying forest vegetation?	135
11.2. From recent forests: a synecological point of view	136

11.3. From the walls: ancient documents and maps	136
11.4. From the wood: dendrochronology	139
11.5. From the ground: palynology	140
11.6. From the air: LiDAR.	142
11.7. Discussion.	143
11.8. References	146
Chapter 12. The Gate to the Forest is in its History	151
Keith J. KIRBY	
12.1. Introduction	151
12.2. The ancient woodland idea	152
12.3. Legacies of woodland management.	153
12.4. Seeing the trees, not the woods	154
12.5. Exploring the distant past	155
12.6. Trees and woods from the past to the future	157
12.7. References	158
Chapter 13. Plant Assemblages and Ecosystem Functioning, a Legacy of Long-term Interactions with Large Herbivores	163
Christophe BALTZINGER and Anders MÅRELL	
13.1. Introduction	163
13.2. Large herbivores are ecosystem dominant interactors.	164
13.2.1. Large herbivores as ecosystem engineers	164
13.2.2. Large herbivores and plant assemblages.	166
13.3. Long-term effects and methodological changes	167
13.3.1. Paleoecological records	167
13.3.2. Modern data	167
13.4. Plant–herbivore interactions over the long-term.	168
13.4.1. Quaternary communities of large herbivores and associated flora	168
13.4.2. The forest in the early Holocene	169
13.5. Modern vegetation trajectories driven by large herbivores	170
13.5.1. Herbivory effects	170
13.5.2. Temporal trajectories	170
13.6. Perspectives, rewilding and ecosystem restoration	172
13.7. References	173

Chapter 14. A Historical Ecology of the Compiègne Forest (N France) . . .	177
Jérôme BURIDANT, Boris BRASSEUR, Hélène HOREN, Emilie GALLET-MORON and Guillaume DECOQ	
14.1. Introduction	177
14.2. The ancient forest: an intensively managed agricultural landscape?	178
14.3. The Medieval forest: a woodland (re)birth or a savanna-like ecosystem?	184
14.4. The contemporary forest (19th century onward): a closed-canopy multifunctional woodland	188
14.5. Conclusion	190
14.6. References	191
 Chapter 15. The Chestnut Orchards in the Bolognese Apennines: A Vanishing Socio-ecological Habitat	 195
Giovanna PEZZI, Fabrizio FERRETTI, Alberto MALTONI, Patrik KREBS, Marco CONEDERA and Giorgio MARESI	
15.1. Introduction	195
15.2. The traditional chestnut orchards	197
15.3. The chestnut groves of the Bolognese Apennines	198
15.4. A changing world: abandonment, diseases and other problems	199
15.5. The turning point of the 1980s	199
15.6. Current constraints and future perspectives	200
15.7. References	203
 Chapter 16. Claudius' Coin in the Forest – Niche Construction and Strategies by Early Colonizers of Boreal Inlands in Central Scandinavia	 207
Ove ERIKSSON and Karl-Johan LINDHOLM	
16.1. Introduction	207
16.2. Concepts and theoretical framework	210
16.3. A historical overview of the colonization	211
16.4. A structured landscape	212
16.4.1. Constructing the environment	212
16.4.2. Managing livestock	213
16.4.3. Shielings (secondary farms)	214
16.5. Concluding remarks	216
16.6. References	217

Chapter 17. Recent History of Vegetation Changes in the Arctic	221
Antoine BECKER-SCARPITTA, Bastien PARISY and Tomas ROSLIN	
17.1. Introduction	221
17.2. The Arctic tundra biome	222
17.3. The Arctic historical ecological archive	222
17.3.1. Remote sensing over time	223
17.3.2. Field-based records	223
17.4. Changes over time in tundra vegetation	225
17.4.1. Changes in vegetation productivity	225
17.4.2. Changes in vegetation phenology	226
17.4.3. Changes in plant community structure, composition and diversity	227
17.5. Synthesis and perspectives	229
17.6. References	230
Chapter 18. Reconstructing the Impact of Humans on Aotearoa New Zealand's Biodiversity	233
Nicolas J. RAWLENCE, Alexander J.F. VERRY, Karen GREIG, Justin J. MAXWELL, Lara D. SHEPHERD and Richard WALTER	
18.1. Introduction	233
18.2. Archaeological evidence for anthropogenic impact in New Zealand	234
18.3. Paleovegetation change in pre- and post-European contact New Zealand.	237
18.4. Utilizing Aotearoa's natural resources: Māori cultivation and translocation of flora and fauna	239
18.5. Evolutionary consequences of Polynesian and European arrival.	240
18.6. Conclusion	243
18.7. References	243
Chapter 19. Historical Ecology of the Coastal Aeolian Sedimentary Systems of the Canary Islands	247
Aarón Moisés SANTANA-CORDERO, Antonio Ignacio HERNÁNDEZ-CORDERO, Néstor MARRERO-RODRÍGUEZ, Leví GARCÍA-ROMERO, Elisabet FERNÁNDEZ-CABRERA, Carolina PEÑA-ALONSO, Emma PÉREZ-CHACÓN ESPINO and Luis HERNÁNDEZ-CALVENTO	
19.1. Introduction	247
19.2. Study sites.	248
19.3. Historical evolution of the coastal aeolian sedimentary systems of the Canary Islands	251
19.3.1. 19th century: territorial consolidation and spread of the agrarian socioeconomic system.	252
19.3.2. 20th century to the present day: the tourism transformation	253

19.4. Conclusion	255
19.5. References	256
Chapter 20. Historical Forest Microclimates	259
Emiel DE LOMBAERDE, Karen DE PAUW, Pallieter DE SMEDT, Jonathan LENOIR, Camille MEEUSSEN, Thomas VANNESTE, Kris VERHEYEN, Florian ZELLWEGER and Pieter DE FRENNE	
20.1. Drivers of microclimate at the plot, forest and landscape scale	261
20.2. Methods to infer microclimate from the past and predict into the future	265
20.3. Why do historical microclimates matter? Impacts on biodiversity from the plot to landscape scale	268
20.4. Conclusion	270
20.5. References	270
Chapter 21. Causes and Consequences of Extinction Debts: Perspectives for Historical Ecology and Biological Conservation.	273
Grégoire BLANCHARD and François MUNOZ	
21.1. Introduction	273
21.2. Causes and processes entailing extinction debts.	274
21.3. Studying and detecting extinction debts from ecosystem history	276
21.4. Implications for biodiversity conservation and management.	280
21.5. Conclusion	281
21.6. References	282
Chapter 22. Historical Ecology for the Past and the Future: Organizing at Local and Regional Scales.	285
Carole L. CRUMLEY	
22.1. Introduction	285
22.2. Founding IHOPE.	286
22.3. Integrating the social sciences and humanities.	287
22.4. Historical ecology	288
22.5. Conclusion	290
22.6. References	291
List of Authors	295
Index	301
