<b>List of Notations</b> . . . . .	ix
<b>Preface</b> . . . . .	xi
<b>Chapter 1. Introduction</b> . . . . .	1
1.1. Probability concepts . . . . .	2
1.1.1. Random variables . . . . .	5
1.1.2. Discrete probability functions . . . . .	6
1.1.3. Probability generating function . . . . .	7
1.1.4. Continuous probability functions . . . . .	7
1.1.5. Laplace transform and Laplace-Stieltjes transform . . . . .	9
1.1.6. Measures of a random variable . . . . .	10
1.2. Renewal process . . . . .	11
1.2.1. Renewal function . . . . .	12
1.2.2. Terminating renewal process . . . . .	15
1.2.3. Poisson process . . . . .	16
1.3. Matrix analysis . . . . .	18
1.3.1. Basics . . . . .	18
1.3.2. Eigenvalues and eigenvectors . . . . .	23
1.3.3. Partitioned matrices . . . . .	27
1.3.4. Matrix differentiation . . . . .	28
1.3.5. Exponential matrix . . . . .	30
1.3.6. Kronecker products and Kronecker sums . . . . .	32
1.3.7. Vectorization (or direct sums) of matrices . . . . .	33
<b>Chapter 2. Markov Chains</b> . . . . .	35
2.1. Discrete-time Markov chains (DTMC) . . . . .	36
2.1.1. Basic concepts, key definitions and results . . . . .	36

2.1.2. Computation of the steady-state probability vector of DTMC . . .	43
2.1.3. Absorbing DTMC . . . . .	45
2.1.4. Taboo probabilities in DTMC . . . . .	47
2.2. Continuous-time Markov chain (CTMC) . . . . .	48
2.2.1. Basic concepts, key definitions and results . . . . .	48
2.2.2. Computation of exponential matrix . . . . .	52
2.2.3. Computation of the limiting probabilities of CTMC . . . . .	57
2.2.4. Computation of the mean first passage times . . . . .	58
2.3. Semi-Markov and Markov renewal processes . . . . .	61
<b>Chapter 3. Discrete Phase Type Distributions . . . . .</b>	<b>71</b>
3.1. Discrete phase type (DPH) distribution . . . . .	72
3.2. DPH renewal processes . . . . .	92
3.3. Exercises . . . . .	97
<b>Chapter 4. Continuous Phase Type Distributions . . . . .</b>	<b>101</b>
4.1. Continuous phase type (CPH) distribution . . . . .	101
4.2. CPH renewal process . . . . .	120
4.3. Exercises . . . . .	137
<b>Chapter 5. Discrete-Batch Markovian Arrival Process . . . . .</b>	<b>143</b>
5.1. Discrete-batch Markovian arrival process (D-BMAP) . . . . .	144
5.2. Counting process associated with the D-BMAP . . . . .	152
5.3. Generation of D-MAP processes for numerical purposes . . . . .	162
5.4. Exercises . . . . .	165
<b>Chapter 6. Continuous-Batch Markovian Arrival Process . . . . .</b>	<b>171</b>
6.1. Continuous-time batch Markovian arrival process (BMAP) . . . . .	171
6.2. Counting processes associated with BMAP . . . . .	177
6.3. Generation of MAP processes for numerical purposes . . . . .	198
6.4. Exercises . . . . .	206
<b>Chapter 7. Matrix-Analytic Methods (Discrete-Time) . . . . .</b>	<b>213</b>
7.1. $M/G/1$ -paradigm (scalar case) . . . . .	215
7.2. $M/G/1$ -paradigm (matrix case) . . . . .	224
7.3. $GI/M/1$ -paradigm (scalar case) . . . . .	244
7.4. $GI/M/1$ -paradigm (matrix case) . . . . .	252
7.5. QBD process (scalar case) . . . . .	268
7.6. QBD process (matrix case) . . . . .	269
7.7. Exercises . . . . .	278

---

<b>Chapter 8. Matrix-Analytic Methods (Continuous-time)</b> . . . . .	291
8.1. <i>M/G/1</i> -type (scalar case) . . . . .	291
8.2. <i>M/G/1</i> -type (matrix case) . . . . .	295
8.3. <i>GI/M/1</i> -type (scalar case) . . . . .	297
8.4. <i>GI/M/1</i> -type (matrix case) . . . . .	300
8.5. QBD process (scalar case) . . . . .	304
8.6. QBD process (matrix case) . . . . .	305
8.7. Exercises . . . . .	308
<b>Chapter 9. Applications</b> . . . . .	321
9.1. Production and manufacturing . . . . .	322
9.2. Service sectors . . . . .	323
9.2.1. Healthcare . . . . .	324
9.2.2. Artificial Intelligence and the Internet of Things . . . . .	324
9.2.3. Biological and medicine . . . . .	325
9.2.4. Telecommunications . . . . .	325
9.2.5. Supply chain . . . . .	325
9.2.6. Consumer issues . . . . .	326
<b>References</b> . . . . .	327
<b>Index</b> . . . . .	335
<b>Summary of Volume 2</b> . . . . .	339
