<b>Foreword</b> . . . . .	xv
Fiona FRICK	
<b>Acknowledgements</b> . . . . .	xvii
Emmanuel JURCZENKO	
<b>Introduction</b> . . . . .	xix
Andrew ANG	
<b>Chapter 1. The Price of Factors and the Implications for Active Investing</b> . . . . .	1
Inigo FRASER-JENKINS	
1.1. Introduction . . . . .	1
1.2. Smart beta: the Uber of asset management . . . . .	2
1.3. Allocating to smart beta: an unambiguously active decision . . . . .	7
1.4. Adoption of smart beta . . . . .	10
1.5. Organizational issues for smart beta . . . . .	13
1.6. Toward idiosyncratic returns . . . . .	14
1.7. The role of benchmarks: has the benchmark triumphed, or is it dead? . . . . .	14
1.8. Idiosyncratic returns: the emergence of a multivariate benchmark whether one likes it or not . . . . .	16
1.9. Opportunities for asset managers and asset owners . . . . .	21
1.10. Bibliography . . . . .	23

---

<b>Chapter 2. Factor Investing: The Rocky Road from Long-Only to Long-Short . . . . .</b>	<b>25</b>
Marie BRIÈRE and Ariane SZAFARZ	
2.1. Introduction . . . . .	25
2.2. Short-selling and factor investing . . . . .	27
2.3. Data and methods . . . . .	30
2.3.1. Data . . . . .	30
2.3.2. Methods . . . . .	32
2.4. Empirical results . . . . .	36
2.4.1. Efficient frontiers . . . . .	36
2.4.2. Horizontal and vertical tests . . . . .	37
2.5. Conclusion . . . . .	42
2.6. Bibliography . . . . .	43
<b>Chapter 3. Peering under the Hood of Rules-Based Portfolio Construction: The Impact of Security Selection and Weighting Decisions . . . . .</b>	<b>47</b>
Jennifer BENDER, Xiaole SUN and Taie WANG	
3.1. Introduction . . . . .	47
3.2. A framework for rules-based portfolio construction . . . . .	48
3.3. Key decisions for rules-based portfolio construction: security selection and weighting . . . . .	49
3.3.1. Security selection . . . . .	50
3.3.2. Security weighting . . . . .	53
3.4. The maximum effective multiplier . . . . .	56
3.4.1. A closed-form solution to a limit on the MEM under certain assumptions . . . . .	56
3.4.2. Effective multipliers under generalized conditions . . . . .	56
3.5. Analyzing the MEM for several popular cases . . . . .	58
3.6. Conclusion . . . . .	65
3.7. Appendices . . . . .	66
3.7.1. Appendix A: Description of the kinked multiplier scheme . . . . .	66
3.7.2. Appendix B: Proof behind the limit to the MEM . . . . .	66
3.7.3. Appendix C: Deriving a general relationship between the initial multipliers and effective multipliers . . . . .	69
3.7.4. Appendix D: Derivations in section 3.5 . . . . .	70
3.8. Bibliography . . . . .	71

---

<b>Chapter 4. Diversify and Purify Factor Premiums in Equity Markets . . . . .</b>	<b>73</b>
Raul LEOTE DE CARVALHO, Xiao LU, François SOUPE and Patrick DUGNOLLE	
4.1. Introduction . . . . .	73
4.2. Factors . . . . .	74
4.2.1. Raw factors . . . . .	75
4.2.2. Factor premiums . . . . .	77
4.3. Results . . . . .	77
4.3.1. Factor z-scores . . . . .	77
4.3.2. Factor portfolio construction . . . . .	78
4.3.3. Impact of hedging beta and size, neutralizing sectors and targeting volatility . . . . .	81
4.3.4. Beta of hedged factor strategy returns . . . . .	84
4.3.5. Sector neutralization . . . . .	85
4.3.6. Region neutralization in global strategies . . . . .	86
4.3.7. Contribution from stocks with positive and negative factor scores . . . . .	88
4.3.8. Volatility, leverage and turnover of hedged factor strategies . . . . .	90
4.3.9. Skewness and kurtosis of hedged factor strategy returns . . . . .	93
4.4. Conclusions . . . . .	95
4.5. Bibliography . . . . .	96
<b>Chapter 5. The Predictability of Risk-Factor Returns . . . . .</b>	<b>99</b>
Robert J. BIANCHI, Michael E. DREW and Scott N. PAPPAS	
5.1. Introduction . . . . .	99
5.2. Literature review . . . . .	101
5.3. Methodology . . . . .	102
5.3.1. Predictive regression model . . . . .	102
5.3.2. Forecast combination . . . . .	103
5.3.3. Forecast evaluation . . . . .	104
5.3.4. Economic significance . . . . .	104
5.4. Data . . . . .	106
5.5. Results . . . . .	108
5.5.1. Single economic variable forecasts . . . . .	108
5.5.2. Combination forecasts . . . . .	113
5.6. Conclusion . . . . .	124
5.7. Bibliography . . . . .	124

---

<b>Chapter 6. Style Factor Timing . . . . .</b>	<b>127</b>
Yin LUO	
6.1. Introduction . . . . .	127
6.1.1. The culprit and the verdict . . . . .	130
6.1.2. Rising factor correlation and heightened downside risk . . . . .	131
6.1.3. The impact of risk-on/risk-off . . . . .	132
6.1.4. Factor payoff patterns are becoming increasingly nonlinear . . . . .	135
6.2. Why does it matter? . . . . .	137
6.3. Modeling techniques . . . . .	140
6.3.1. Cross-sectional approach . . . . .	140
6.3.2. Time series approach . . . . .	142
6.4. Global macro database . . . . .	143
6.4.1. Policy uncertainty . . . . .	145
6.4.2. Nowcasting and economic cycle . . . . .	147
6.4.3. Capital market variables . . . . .	150
6.4.4. Seasonality . . . . .	151
6.5. Conclusion . . . . .	152
6.6. Bibliography . . . . .	152
<b>Chapter 7. Go with the Flow or Hide from the Tide? Trading Flow as a Signal in Style Investing . . . . .</b>	<b>155</b>
Daniel GIAMOURIDIS, Michael NEUMANN and Michael STELIAROS	
7.1. Introduction . . . . .	155
7.2. Data . . . . .	158
7.3. Style portfolios and style flows . . . . .	160
7.4. Style flows, returns and risk: a statistical perspective . . . . .	161
7.4.1. Style flows and returns . . . . .	161
7.4.2. Style flows and style risk . . . . .	165
7.5. Economic significance . . . . .	167
7.5.1. Single-factor strategies . . . . .	168
7.5.2. Multifactor strategies . . . . .	175
7.6. The effect of using non-overlapping data . . . . .	177
7.7. Conclusions . . . . .	178
7.8. Bibliography . . . . .	179

---

<b>Chapter 8. Investment and Profitability: A Quality Factor that Actually Works . . . . .</b>	<b>181</b>
Jason HSU, Vitali KALESNIK and Engin KOSE	
8.1. Introduction . . . . .	181
8.1.1. Robustness of existing “quality” factor product offering categories . . . . .	183
8.2. Literature review . . . . .	184
8.2.1. Profitability (and investment) . . . . .	184
8.2.2. Earnings stability . . . . .	188
8.2.3. Capital structure . . . . .	188
8.2.4. Growth in profitability . . . . .	189
8.2.5. Accounting quality . . . . .	189
8.2.6. Summary of the literature review . . . . .	189
8.3. Robustness across geographies and definitions . . . . .	190
8.3.1. Profitability . . . . .	195
8.3.2. Earnings stability, capital structure and growth in profitability . . . . .	196
8.3.3. Accounting quality . . . . .	196
8.3.4. Summary of robustness tests . . . . .	196
8.4. A more detailed examination of profitability and investment . . . . .	197
8.4.1. Treating profitability and investment as a combined factor . . . . .	198
8.4.2. Robustness of profitability and investment combination . . . . .	200
8.5. Conclusion . . . . .	201
8.6. Appendix: Profitability and investment from multifactor perspective – a practitioner’s perspective . . . . .	202
8.7. Bibliography . . . . .	204
<b>Chapter 9. Common Equity Factors in Corporate Bond Markets . . . . .</b>	<b>207</b>
Demir BEKTIC, Ulrich NEUGEBAUER, Michael WEGENER and Josef-Stefan WENZLER	
9.1. Introduction . . . . .	207
9.2. Traditional indices in fixed-income markets . . . . .	209
9.3. Factor investing in credit markets . . . . .	210
9.3.1. Size . . . . .	211
9.3.2. Value . . . . .	211
9.3.3. Momentum . . . . .	212
9.3.4. Beta . . . . .	212
9.4. Data and methodology . . . . .	213

9.4.1. Data . . . . .	213
9.4.2. Methodology . . . . .	214
9.5. Empirical results . . . . .	215
9.5.1. Comparing factor portfolio returns in credit markets . . . . .	215
9.5.2. Single-factor performance . . . . .	216
9.5.3. Multi-factor performance . . . . .	217
9.5.4. Factor performance after transaction costs . . . . .	222
9.6. Conclusion . . . . .	222
9.7. Bibliography . . . . .	223
 <b>Chapter 10. Alternative Risk Premia: What Do We Know?</b> . . . . .	227
Thierry RONCALLI	
10.1. Introduction . . . . .	228
10.2. The rationale of ARP . . . . .	229
10.2.1. Difference between common risk factors and arbitrage factors . . . . .	229
10.2.2. Factor investing in the equity market . . . . .	232
10.3. Defining ARP . . . . .	236
10.3.1. Skewness risk premia and market anomalies . . . . .	237
10.3.2. Identification of ARP . . . . .	240
10.3.3. Carry and momentum everywhere . . . . .	245
10.4. Portfolio allocation with ARP . . . . .	247
10.4.1. Volatility diversification . . . . .	248
10.4.2. Skewness aggregation . . . . .	248
10.4.3. Portfolio management . . . . .	251
10.5. Conclusion . . . . .	255
10.6. Appendix: Mathematical results . . . . .	256
10.6.1. The contrarian (or reversal) strategy with a price target . . . . .	256
10.6.2. The trend-following strategy with an EWMA trend . . . . .	257
10.6.3. Skewness aggregation of two log-normal random variables . . . . .	257
10.6.4. A skewness model of asset returns . . . . .	259
10.7. Bibliography . . . . .	261
 <b>Chapter 11. Strategic Portfolio Allocation With Factors</b> . . . . .	265
Bob BASS, David GREENBERG and Michael KISHINEVSKY	
11.1. Introduction . . . . .	265
11.2. Factors . . . . .	266
11.3. What do I own?. . . . .	268
11.3.1. Scenario analysis . . . . .	274
11.4. What do I want to own?. . . . .	276
11.5. How do I get there? . . . . .	278

---

11.6. Conclusion . . . . .	280
11.7. Appendix . . . . .	281
11.8. Bibliography . . . . .	283
<b>Chapter 12. A Macro Risk-Based Approach to Alternative Risk Premia Allocation . . . . .</b>	<b>285</b>
Olivier BLIN, Florian IELPO, Joan LEE and Jérôme TEILETCHE	
12.1. Introduction . . . . .	285
12.2. Literature review . . . . .	287
12.3. Alternative risk premia construction and empirical characteristics . . . . .	289
12.3.1. Alternative risk premia construction . . . . .	289
12.3.2. Empirical characteristics . . . . .	293
12.4. Alternative risk premia and economic regimes: a first overview . . . . .	300
12.5. A macro risk-based asset allocation framework . . . . .	304
12.5.1. Methodology . . . . .	305
12.5.2. Empirical results . . . . .	308
12.6. Conclusion . . . . .	311
12.7. Appendix: Nowcasting economic regimes . . . . .	312
12.8. Bibliography . . . . .	313
<b>Chapter 13. Optimizing Cross-Asset Carry . . . . .</b>	<b>317</b>
Nick BALTAS	
13.1. Introduction . . . . .	317
13.2. The concept of FX carry . . . . .	319
13.3. Extending the idea across asset classes . . . . .	322
13.4. Data and carry diagnostics . . . . .	326
13.4.1. The universe of assets and asset classes . . . . .	326
13.4.2. Measuring carry across asset classes . . . . .	329
13.5. Constructing carry portfolios . . . . .	331
13.5.1. Cross-sectional carry . . . . .	331
13.5.2. Time-series carry . . . . .	335
13.5.3. The relationship between XS and TS carry strategies . . . . .	339
13.5.4. Optimized carry . . . . .	341
13.6. Is it crash risk? . . . . .	350
13.6.1. Downside risk analysis . . . . .	351
13.6.2. Equity volatility risk analysis . . . . .	355
13.6.3. Multiasset carry analysis . . . . .	356
13.7. Concluding remarks . . . . .	357

---

13.8. Appendix: Estimating the carry metric for each asset class . . . . .	358
13.9. Bibliography . . . . .	360
<b>Chapter 14. Diversification and the Volatility Risk Premium . . . . .</b>	<b>365</b>
Harindra DE SILVA, GREGORY M. McMURRAN and Megan N. MILLER	
14.1. Introduction . . . . .	365
14.2. Definition of VRP . . . . .	367
14.3. Why does it exist? . . . . .	369
14.4. Evidence from CBOE Indices on VRP . . . . .	370
14.5. Trading the VRP . . . . .	372
14.6. Data construction . . . . .	374
14.7. VRPs in a portfolio context . . . . .	382
14.8. VRPs and PFPs . . . . .	383
14.9. Conclusion . . . . .	386
14.10. Bibliography . . . . .	386
<b>Chapter 15. Factor Investing and ESG Integration . . . . .</b>	<b>389</b>
Dimitris MELAS, Zoltan NAGY and Padmakar KULKARNI	
15.1. Introduction . . . . .	389
15.2. Data and methodology . . . . .	391
15.3. Treating ESG as a factor . . . . .	392
15.4. Integrating ESG into passive strategies . . . . .	396
15.5. Integrating ESG into factor strategies . . . . .	399
15.5.1. Integrating ESG into minimum volatility . . . . .	399
15.5.2. Integrating ESG into quality strategies . . . . .	401
15.5.3. Integrating ESG into yield strategies . . . . .	402
15.5.4. Integrating ESG into value strategies . . . . .	404
15.5.5. Integrating ESG into momentum strategies . . . . .	404
15.5.6. Integrating ESG into low-size strategies . . . . .	406
15.6. Summary of results and implications for portfolio construction . . . . .	406
15.7. Conclusion . . . . .	408
15.8. Appendices . . . . .	409
15.8.1. Appendix 1: Does an ESG constraint improve the overall sustainability profile? . . . . .	409
15.8.2. Appendix 2: Are factors significant sources of performance after integrating ESG? . . . . .	410
15.8.3. Appendix 3: How much ESG should you add to your portfolio? . . . . .	411
15.9. Bibliography . . . . .	412

---

<b>Chapter 16. The Alpha and Beta of Equity Hedge UCITS Funds: Implications for Momentum Investing</b>	415
Nabil BOUAMARA, Kris BOUDT, Benedict PEETERS and James THEWISSEN	
16.1. Introduction	416
16.2. Literature review	417
16.2.1. UCITS fund structure	417
16.2.2. Prior research on alternative UCITS	418
16.2.3. Data biases of alternative UCITS	419
16.2.4. Review of the factor model approach to study fund performance	420
16.3. Data and methodology	421
16.3.1. Data	421
16.3.2. Factor model specification	423
16.4. The cross-section of factor exposures and residual performance	428
16.4.1. Style-based analysis	428
16.4.2. Risk factor analysis	431
16.4.3. Peer performance	436
16.5. Persistence of equity hedge UCITS managers.	439
16.6. Concluding remarks	442
16.7. Bibliography	444
<b>List of Authors</b>	447
<b>Endorsements</b>	451
<b>Index</b>	453
