<b>List of Abbreviations</b> . . . . .	ix
<b>Preface</b> . . . . .	xv
Brigitte VAN VLIET-LANOË and Françoise BERGERAT	
<b>Introduction</b> . . . . .	xix
Brigitte VAN VLIET-LANOË and René MAURY	
<b>Chapter 1. Young Icelandic Volcanism and its Implications</b> . . . . .	1
René MAURY and Brigitte VAN VLIET-LANOË	
1.1. Introduction. . . . .	1
1.2. Icelandic magma series . . . . .	3
1.2.1. Lava types . . . . .	3
1.2.2. Geochemical diversity of young Icelandic basalts and their sources . . . . .	8
1.2.3. Some geochemical constraints concerning the origin and geodynamic evolution of Iceland . . . . .	13
1.3. Central volcanoes and active fissural systems . . . . .	14
1.3.1. Central volcanoes . . . . .	14
1.3.2. Fissural volcanism and subaerial lava flows . . . . .	17
1.3.3. Hydromagmatism . . . . .	26
1.4. Volcanic hazards in Iceland . . . . .	31
1.4.1. Hazards related to lava flows . . . . .	31

1.4.2. Hazards related to explosions and gas emissions . . . . .	32
1.4.3. <i>Jökulhlaups</i> and associated hazards . . . . .	37
1.4.4. Icelandic dust: a consequence of volcanism . . . . .	44
1.5. References . . . . .	51

## **Chapter 2. Volcanism and Glaciations: Forcings and Chronometers . . . . . 57**

Hervé GUILLOU, René MAURY and Brigitte VAN VLIET-LANOË

2.1. Subglacial volcanic landforms. . . . .	57
2.1.1. Subglacial isolated volcanoes or tuyas . . . . .	58
2.1.2. Hyaloclastite ridges or tindar . . . . .	61
2.2. Volcanism, deglaciation and climate . . . . .	65
2.2.1. General features: deglaciation, discharge and partial melting . . . . .	65
2.2.2. Deglaciation and climate feedback. . . . .	69
2.3. The hypothesis of a link between volcanism and climate and its test by dating . . . . .	70
2.3.1. The K-Ar chronometer. . . . .	71
2.3.2. The combination of K-Ar and $^{40}\text{Ar}/^{39}\text{Ar}$ methods for dating Icelandic volcanism . . . . .	80
2.3.3. A link between volcanism and climate according to K-Ar ages?. . . . .	86
2.3.4. A rhyolitic volcanism synchronous with deglaciations? . . . . .	88
2.4. References . . . . .	95

## **Chapter 3. Cenozoic Evolution of Iceland and the Cryosphere . . . . . 103**

Brigitte VAN VLIET-LANOË and Hervé GUILLOU

3.1. Ice ages and the opening of the Atlantic . . . . .	103
3.1.1. The Middle and Final Miocene cooling . . . . .	108
3.1.2. The acceleration of the Middle Pliocene . . . . .	109
3.1.3. The Middle Pleistocene Transition. . . . .	112
3.1.4. The initiation of thermohaline circulation. . . . .	114
3.2. Iceland's Quaternary glaciations . . . . .	116
3.2.1. Conditions for the development and functioning of ice caps . . . . .	116
3.2.2. Glacio-isostasy . . . . .	119
3.2.3. Icelandic data . . . . .	123
3.2.4. The Icelandic record . . . . .	126

---

3.3. The last glacial episode and its deglaciation . . . . .	142
3.3.1. The Weichselian. . . . .	142
3.3.2. The Last Glacial Maximum . . . . .	144
3.3.3. Deglaciation and the Holocene . . . . .	150
3.4. Iceland today, its climate and vegetation . . . . .	161
3.4.1. The climate. . . . .	161
3.4.2. Ocean circulation and climate. . . . .	162
3.4.3. Soil, people and climate . . . . .	167
3.4.4. Soils and erosion . . . . .	173
3.5. References . . . . .	179
<b>Conclusion</b> . . . . .	193
Brigitte VAN VLIET-LANOË, René MAURY and Hervé GUILLOU	
<b>References</b> . . . . .	199
<b>List of Authors</b> . . . . .	213
<b>Index</b> . . . . .	215
<b>Summary of Volume 1</b> . . . . .	221
