<b>FOREWORD</b> . . . . .	xv
<b>INTRODUCTION</b> . . . . .	xvii
<b>CHAPTER 1. FUNDAMENTALS</b> . . . . .	1
1.1. Different kinds of network . . . . .	1
1.1.1. Classic definitions . . . . .	1
1.1.2. National networks and international connections . . . . .	3
1.1.3. Network exploiters and operators . . . . .	5
1.1.4. Economic role of MVNOs and VNO . . . . .	8
1.1.5. Public and private networks . . . . .	8
1.1.6. Fixed and radio networks. . . . .	9
1.1.7. Main operators worldwide . . . . .	10
1.1.8. Pan-European network project. . . . .	11
1.1.9. Single European hub for telecoms regulation . . . . .	12
1.1.10. Pooling of network infrastructures . . . . .	12
1.1.11. Energy consumption of telecoms systems . . . . .	12
1.2. Financial aspects relating to networks. . . . .	13
1.2.1. Economic studies in telecommunications . . . . .	13
1.2.2. Cost price . . . . .	14
1.2.3. Financial mechanisms involved . . . . .	15
1.2.4. Cost of networks and operator charges. . . . .	16
1.2.5. The hidden income source for long-standing network operators . . . . .	16

1.3. Historical overview of the communications market . . . . .	17
1.3.1. Industry in France . . . . .	17
1.3.2. Components, past and present . . . . .	19
1.3.3. Tomorrow's components . . . . .	20
1.3.4. History of network operators. . . . .	23
1.3.5. Financing of networks. . . . .	24
1.3.6. National and international legislation. . . . .	24
1.4. Networking techniques . . . . .	25
1.4.1. Analog vs. digital . . . . .	25
1.4.2. Circuit-switching. . . . .	27
1.4.3. Data packet switching and the Internet. . . . .	28
1.4.4. Intelligent networks and NGNs . . . . .	30
1.4.5. Range and availability of networks . . . . .	30
1.4.6. Confidentiality . . . . .	31
1.5. Choices available to companies in a changing world. . . . .	32
1.5.1. SMEs faced with ICT . . . . .	32
1.5.2. SMEs faced with the choice of a connection . . . . .	33
1.5.3. Factors in choosing a connection for a company . . . . .	33
1.6. Summary . . . . .	34
<b>CHAPTER 2. COMMUNICATION TECHNIQUES . . . . .</b>	<b>35</b>
2.1. Transmission parameters . . . . .	35
2.1.1. Frequency ranges in transmission . . . . .	36
2.1.2. Attenuation . . . . .	37
2.1.3. Phase, jitter and latency. . . . .	38
2.1.4. Noise and crosstalk . . . . .	38
2.1.5. Synchronization . . . . .	39
2.1.6. Echoes. . . . .	39
2.1.7. Micro-cuts. . . . .	39
2.1.8. Error rate on binary elements . . . . .	39
2.2. Modulation and encoding . . . . .	39
2.2.1. Main types of modulation . . . . .	39
2.2.2. Frequency Division Multiplexing (FDM) . . . . .	40
2.2.3. Wave Division Multiplexing (WDM) . . . . .	40
2.2.4. Time Division Multiplexing (TDM) . . . . .	41
2.2.5. Source encoding and channel encoding . . . . .	41
2.2.6. Error management . . . . .	43

---

2.3. Switching. . . . .	44
2.4. Signaling in networks . . . . .	46
2.5. Protocols and data exploitation . . . . .	47
2.5.1. Information to be transmitted . . . . .	47
2.5.2. Exploitation of digital connections . . . . .	48
2.5.3. Modes of communication. . . . .	48
2.5.4. Data rate of a digital connection. . . . .	51
2.6. The “OSI model” . . . . .	52
2.6.1. Definition of communication protocols . . . . .	52
2.6.2. Principle of the OSI model . . . . .	53
2.6.3. The seven layers of the OSI model . . . . .	54
2.6.4. Evolution of the OSI model . . . . .	55
2.6.5. Information Communication Architecture (ICA) . . . . .	56
2.6.6. Layers 1 and 2 in WANs . . . . .	57
2.6.7. Layer 3 in WANs . . . . .	58
2.6.8. The TCP/IP and UDP/IP combination . . . . .	59
2.6.9. Data encapsulation. . . . .	62
2.6.10. Network protocols associated with IP. . . . .	64
2.7. Local Area Network (LAN). . . . .	67
2.7.1. PBX and LAN . . . . .	67
2.7.2. Functions of PBX . . . . .	67
2.7.3. LAN . . . . .	68
2.7.4. Structure of Local Area Networks . . . . .	69
2.7.5. Construction of a private local area network . . . . .	69
2.7.6. Organization of an LAN . . . . .	70
2.7.7. Audio Video Bridging. . . . .	71
2.7.8. Main protocols in LANs . . . . .	71
2.8. Public data networks (Wide-Area Networks – WANs) . . . . .	75
2.8.1. Functional characteristics. . . . .	75
2.8.2. Telecomputing over PSTN . . . . .	76
2.8.3. WAN protocols. . . . .	77
2.8.4. Routers. . . . .	78
2.8.5. The access network and the WAN . . . . .	79
2.9. Network management . . . . .	79
2.10. Summary . . . . .	80

---

<b>CHAPTER 3. TRANSMISSION SUPPORTS</b> . . . . .	81
3.1. Description of supports . . . . .	81
3.1.1. Two-wire or quad-wire metal cables . . . . .	81
3.1.2. Coaxial cables . . . . .	82
3.1.3. Fiber-optic . . . . .	82
3.1.4. Wireless systems . . . . .	83
3.1.5. Audio-video connections . . . . .	84
3.2. Digital wireless access systems . . . . .	85
3.2.1. Public 2G and 3G wireless systems . . . . .	85
3.2.2. LTE, WiMAX and 4G . . . . .	88
3.2.3. Wi-Fi networks . . . . .	95
3.2.4. Small-cell network (SCN, microcells) . . . . .	97
3.2.5. Heterogeneous Networks (HetNets) . . . . .	100
3.2.6. Software-Defined Networks – SDN and SUN . . . . .	101
3.2.7. SONs (Self-Organizing Networks) . . . . .	102
3.2.8. TETRA and PMR . . . . .	103
3.2.9. RAN – Cellular Backhaul Links . . . . .	103
3.2.10. Dedicated satellite Internet network . . . . .	105
3.3. ADSL systems . . . . .	105
3.4. Power-Line Communications (PLC) . . . . .	107
3.5. Composite access networks . . . . .	107
3.5.1. Shared fiber and divided fibers: FTTx . . . . .	107
3.5.2. Connection with a single optical fiber . . . . .	109
3.5.3. Combination of fiber and metal wire pairs – PONs . . . . .	110
3.5.4. Hybrid fiber and coaxial (HFC) . . . . .	111
3.5.5. Combinations of fiber and wireless systems . . . . .	112
3.5.6. VPN using IP or Ethernet . . . . .	112
3.6. Specific network structures . . . . .	113
3.6.1. The IPX Architecture from GSM . . . . .	113
3.6.2. Content Delivery Networks (CDNs) . . . . .	115
3.7. Reminder of the possible data rates . . . . .	115
3.7.1. Long-distance digital connections . . . . .	115
3.7.2. Digital connections in the access network . . . . .	116
3.7.3. Overview of high data rate services . . . . .	116
3.8. Regulations to be observed by operators . . . . .	117

---

<b>CHAPTER 4. NETWORKING PROTOCOLS</b> . . . . .	119
4.1. Problems needing to be resolved . . . . .	119
4.1.1. The double-edged duality of networks . . . . .	119
4.1.2. Diversity of terminals . . . . .	120
4.1.3. Proliferation of applications . . . . .	121
4.1.4. Increased volume of traffic . . . . .	121
4.1.5. The constant feeling of insecurity . . . . .	122
4.2. Circuit-switching and network intelligence . . . . .	123
4.2.1. PSTN (Public Switched Telephone Network) . . . . .	123
4.2.2. ISDN (Integrated Services Digital Network) . . . . .	125
4.2.3. Circuit-switching . . . . .	126
4.2.4. The “intelligent network” (1980) . . . . .	128
4.3. Packet-Switched Data Network (PSDN) . . . . .	129
4.3.1. PSDN: packets and datagrams . . . . .	129
4.3.2. Addressing in IPv4 . . . . .	130
4.3.3. Addressing in IPv6 . . . . .	131
4.3.4. Mutation from IPv4 to IPv6 . . . . .	131
4.3.5. Adoption of IPv6 . . . . .	132
4.3.6. The Long Walk to IPv6 . . . . .	134
4.4. NGNs and IMS ( <i>IP Multimedia Subsystem</i> ) . . . . .	136
4.4.1. Definitions . . . . .	136
4.4.2. Principle of IMS . . . . .	137
4.4.3. Characteristics of IMS . . . . .	140
4.4.4. SIP (protocol) . . . . .	142
4.4.5. Long-distance SIP (SIP Trunking) . . . . .	143
4.4.6. Discord regarding SIP Trunking . . . . .	144
4.4.7. Diameter . . . . .	144
4.5. Virtualization . . . . .	145
4.5.1. Network Function Virtualization . . . . .	145
4.5.2. Virtualization in companies . . . . .	147
4.5.3. Virtualization and fault localization . . . . .	148
4.6. Network security . . . . .	149
4.6.1. The five major points of security . . . . .	149
4.6.2. Attacks on the network . . . . .	150
4.6.3. Computer attacks . . . . .	151
4.6.4. Cyber-espionage . . . . .	153
4.6.5. Securing of exchanges . . . . .	154
4.6.6. Vulnerabilities of mobile terminals . . . . .	155
4.6.7. Virtual Private Networks and security . . . . .	156
4.7. Conclusion . . . . .	158

<b>CHAPTER 5. VOICE SERVICE AND MESSAGING</b> . . . . .	159
5.1. Criteria of quality for voice signals . . . . .	159
5.2. Voice interface . . . . .	160
5.2.1. Analog technique . . . . .	160
5.2.2. Digital technique . . . . .	161
5.2.3. Digitization of voice signals . . . . .	162
5.2.4. PBX . . . . .	162
5.2.5. Special PBXs . . . . .	163
5.3. VoIP and ToIP . . . . .	164
5.3.1. Compression of voice signals and use of a protocol . . . . .	164
5.3.2. Justification for VoIP . . . . .	165
5.3.3. HD Voice Communications . . . . .	165
5.4. Clerical works . . . . .	166
5.4.1. Collaborative communications . . . . .	166
5.4.2. Technologies today . . . . .	167
5.4.3. Terminology surrounding the various services . . . . .	169
5.4.4. Rich Communication Suite (RCS) . . . . .	171
5.4.5. LTE and associated services . . . . .	172
5.4.6. IPX (IP eXchange) structure . . . . .	177
5.4.7. VoIP on cloud (Hosted VoIP) . . . . .	180
5.4.8. Examples of professional messaging services . . . . .	181
5.4.9. Telephony and messaging via the Internet . . . . .	181
5.4.10. WebRTC . . . . .	183
5.4.11. WebRTC and DTMF . . . . .	185
5.4.12. The end of the legacy telephone network (12 June 2018) . . . . .	186
5.4.13. Difficulties and barriers . . . . .	187
5.5. Exploitation of messaging . . . . .	189
5.5.1. Short Message Service . . . . .	189
5.5.2. Competition in the area of SMS . . . . .	190
5.5.3. Stealth SMS . . . . .	190
5.5.4. MMS . . . . .	190
5.5.5. SMS traffic . . . . .	191
5.6. Communications with the emergency services . . . . .	191
5.6.1. Principles . . . . .	191
5.6.2. Mass notification system (MNS) . . . . .	192
5.6.3. Roadside Assistance Service . . . . .	192
5.7. Conclusion . . . . .	193

---

<b>CHAPTER 6. DATA APPLICATIONS</b> . . . . .	195
6.1. Multimedia services . . . . .	195
6.2. Digital Signage . . . . .	197
6.2.1. Definitions . . . . .	197
6.2.2. Fields of application . . . . .	197
6.2.3. Examples of the messages displayed . . . . .	198
6.2.4. Digital signage technologies . . . . .	198
6.2.5. Associated networks . . . . .	199
6.2.6. Feedback . . . . .	199
6.2.7. Application in tele-teaching . . . . .	200
6.2.8. Standardization . . . . .	200
6.2.9. Commercial aspects . . . . .	201
6.3. Identification technologies . . . . .	202
6.3.1. Identification of persons . . . . .	202
6.3.2. Conventional codes . . . . .	203
6.3.3. RFID . . . . .	204
6.3.4. Near Field Communication (NFC) . . . . .	205
6.3.5. QR Code (Quick Response) and Flash code . . . . .	205
6.4. Image services . . . . .	206
6.4.1. Still images . . . . .	206
6.4.2. Animated images . . . . .	207
6.4.3. Distribution of videos or movies . . . . .	209
6.4.4. Videoconferencing . . . . .	209
6.4.5. Image quality . . . . .	210
6.5. Conclusion . . . . .	211
<b>CHAPTER 7. THE INTERNET AND THE NGN</b> . . . . .	213
7.1. Creation and principles of NGNs . . . . .	213
7.1.1. Historical overview . . . . .	213
7.1.2. General features . . . . .	214
7.1.3. Founding organizations involved . . . . .	215
7.1.4. Technical description . . . . .	217
7.1.5. Addressing on the Internet . . . . .	217
7.1.6. Internet statistics . . . . .	219
7.1.7. Management of the Internet . . . . .	219
7.1.8. The NGNs under study at the ITU . . . . .	220
7.2. Usual applications on the Internet . . . . .	222
7.2.1. Original applications . . . . .	222
7.2.2. Mobile Internet access . . . . .	225

---

7.2.3. Online news services . . . . .	225
7.2.4. Remote payment . . . . .	228
7.2.5. Online games . . . . .	231
7.3. Developments currently under way . . . . .	232
7.3.1. Extension of Web applications . . . . .	232
7.3.2. Crowd sourcing . . . . .	236
7.3.3. The personal digital revolution . . . . .	236
7.3.4. Massive Open Online Courses (MOOC). . . . .	236
7.3.5. Technological breakthroughs . . . . .	238
7.4. Cloud computing . . . . .	239
7.4.1. Principle of cloud computing . . . . .	239
7.4.2. Advantages and disadvantages of cloud computing . . . . .	240
7.4.3. Commercial aspects of cloud computing. . . . .	241
7.4.4. Critical view of cloud computing . . . . .	241
7.5. Big Data . . . . .	242
7.6. The Internet of Things (IoT) and M2M . . . . .	243
7.6.1. Definitions . . . . .	243
7.6.2. Intended applications . . . . .	244
7.6.3. Networks and protocols. . . . .	245
7.6.4. Research currently under way . . . . .	246
7.6.5. Weak points of the IoT . . . . .	247
7.7. Social networks and social media . . . . .	247
7.7.1. Definitions . . . . .	247
7.7.2. Examples of social networks. . . . .	248
7.7.3. Social networks and business . . . . .	250
7.7.4. Social networks for the local area . . . . .	252
7.7.5. Fragility of social networks . . . . .	253
7.7.6. Threats. . . . .	253
7.8. Principles of charging . . . . .	255
7.8.1. Fixed-rate contracts or rates based on costs . . . . .	255
7.8.2. Imbalance in terms of remuneration in the value chain . . . . .	255
7.8.3. Cost of a terminal and price of applications . . . . .	257
7.8.4. Profitability of networks . . . . .	258
7.9. The weaknesses of the NGN/Internet construction . . . . .	259
7.9.1. Lack of security . . . . .	259
7.9.2. Variability of QoS . . . . .	261
7.9.3. Protection of personal data . . . . .	262
7.9.4. Intellectual property rights on the Internet. . . . .	262
7.9.5. Lack of an authoritative decision-making body. . . . .	263

7.9.6. Network neutrality, and Net neutrality . . . . .	266
7.9.7. The need for a technical readjustment . . . . .	268
7.9.8. Judgments about the role of the Internet . . . . .	269
7.10. Where is the NGN heading to? . . . . .	271
7.10.1. The strategy of the future Internet . . . . .	271
7.10.2. Internet governance as seen from the outside world . . . . .	272
7.10.3. Research projects . . . . .	273
7.10.4. The Internet in developing countries . . . . .	275
7.10.5. The situation in 2014 . . . . .	276
7.10.6. Scission of the Internet . . . . .	279
7.11. Conclusion . . . . .	280
<b>CHAPTER 8. CHOICES FOR BUSINESSES . . . . .</b>	<b>281</b>
8.1. Analysis of the need for communication . . . . .	282
8.1.1. Internal communication . . . . .	282
8.1.2. External communication . . . . .	282
8.1.3. General recommendations . . . . .	286
8.1.4. Sociology of telecoms. . . . .	286
8.2. ICTs in SMEs . . . . .	288
8.2.1. E-mails. . . . .	288
8.2.2. Collaborative tools. . . . .	290
8.2.3. Social networks . . . . .	290
8.2.4. New digital tools . . . . .	291
8.2.5. Internet in business . . . . .	292
8.2.6. Cyber security . . . . .	292
8.2.7. In search of a metric with which to qualify the digital economy. . . . .	294
8.3. Technological evolution and associated costs . . . . .	296
8.3.1. Requirements in terms of data rate . . . . .	296
8.3.2. Consumer protection . . . . .	298
8.3.3. Business 3.0. . . . .	299
8.3.4. Emergencies and technological redundancy. . . . .	299
8.3.5. The “communication” bill for a company . . . . .	300
8.4. Security in SMEs . . . . .	301
8.4.1. Mobile terminals . . . . .	301
8.4.2. Security of exchanges. . . . .	302
8.4.3. Passwords and practices to be avoided . . . . .	303
8.4.4. Terminal takeover . . . . .	304
8.4.5. USB keys (personal or company property?). . . . .	308
8.4.6. Third-party Wi-Fi access . . . . .	308

8.4.7. Digital security charters . . . . .	311
8.4.8. VPN and Proxy . . . . .	311
8.5. Best practices . . . . .	312
8.5.1. Fragility of NGNs . . . . .	312
8.5.2. The inevitable transformation of companies to digital . . . . .	313
8.5.3. Establishment of social networks in business . . . . .	313
8.5.4. Cloud computing and business . . . . .	315
8.5.5. Construction of a company Website . . . . .	315
8.5.6. Mail order selling in the digital age . . . . .	317
8.5.7. Video for business . . . . .	319
8.5.8. Management of the company's information system . . . . .	321
8.5.9. Network management and management of communication tools . . . . .	321
8.5.10. Power supply to the terminals . . . . .	322
8.5.11. Importance of the IT director . . . . .	323
8.6. References regarding cyber security . . . . .	324
8.7. A few organizations operating in good security practices . . . . .	325
8.7.1. Entities with French jurisdiction . . . . .	325
8.7.2. Entities with international jurisdiction . . . . .	326
8.8. Conclusion . . . . .	328
<b>OVERVIEW AND CONCLUSIONS . . . . .</b>	<b>329</b>
<b>APPENDIX . . . . .</b>	<b>343</b>
<b>GLOSSARY . . . . .</b>	<b>359</b>
<b>BIBLIOGRAPHY . . . . .</b>	<b>367</b>
<b>INDEX . . . . .</b>	<b>371</b>
