Foreword	ix
Preface	xiii
Chapter 1. What Makes New Science and Technology Meaningful to Society?	1
1.1. Motivation and objectives	1
1.2. The need for orientation in NEST fields	8
1.3. Short propaedeutic.	12
1.3.1. The meaning of “sociotechnical meaning”.	12
1.3.2. NEST: new and emerging science and technologies	13
1.3.3. Techno-visionary futures	15
1.4. A brief guide to this book	17
1.4.1. The flow of argumentation	17
1.4.2. The chapters	18
1.4.3. The achievements.	22
Chapter 2. Extending the Object of Responsibility Assessments in RRI	25
2.1. Motivation and overview.	25
2.2. Some impressions of RRI debates so far.	27
2.3. A pragmatic view on the notion of responsibility	31
2.3.1. The concept of responsibility	32
2.3.2. The EEE approach to responsibility	34
2.3.3. Responsibility assessment.	35
2.4. The object of responsibility debates in RRI so far	38
2.5. The object of responsibility debates in RRI: an extension	39
2.6. Concluding remarks.	43

Chapter 3. Assessing Responsibility by Considering Techno-Futures	45
3.1. Responsibility assessments: introduction and overview.	45
3.2. Brief remarks on the epistemology of prospective knowledge.	46
3.2.1. The epistemologically precarious character of prospective knowledge.	47
3.2.2. Futures as social constructs	48
3.3. Responsibility for NEST: the orientation dilemma.	50
3.3.1. Challenges to providing orientation in NEST fields	52
3.3.2. The orientation dilemma.	55
3.4. Three modes of orientation.	56
3.4.1. Prediction and prognostication: mode 1 orientation	57
3.4.2. Scenarios and the value of diversity: mode 2 orientation	58
3.4.3. The value of divergence: mode 3 orientation.	60
3.5. The hermeneutic approach to techno-visionary futures	61
Chapter 4. Definitions and Characterizations of NEST as Construction of Meaning	65
4.1. Motivation and point of departure	65
4.2. Some observations from NEST debates	66
4.2.1. Nanotechnology.	66
4.2.2. Synthetic biology	68
4.2.3. Enhancement	71
4.3. The pragmatic character of definitions.	72
4.4. Defining and characterizing as meaning-giving activity	75
Chapter 5. Understanding Nanotechnology: A Process Involving Contested Assignments of Meaning	79
5.1. Nanotechnology: a paradigmatic RRI story	79
5.2. The early time of nanotechnology: troubled beginnings	82
5.2.1. Apocalyptic techno-visionary futures related to nano	82
5.2.2. Threats to human health and the environment	84
5.2.3. Philosophical characterizations.	86
5.3. Defining nanotechnology: a mission impossible?	89
5.4. The meaning of nanotechnology: the shift from a revolutionary to a quite normal technology.	94

5.4.1. Looking back: the development of nanotechnology's meaning	94
5.4.2. Hermeneutic work on nanotechnology	96
5.4.3. Lessons learned for RRI debates	99
Chapter 6. Robots: Challenge to the Self-Understanding of Humans.	101
6.1. Autonomous technology: challenges to our comprehension	101
6.2. Robots that can make plans and Man's self-image.	103
6.2.1. Planning robots	103
6.2.2. Planning as special type of acting	105
6.2.3. Step 1: Can robots act?.	107
6.2.4. Step 2: What do robots do when they plan?	109
6.2.5. The difference between planning humans and planning robots	113
6.3. Technology futures in robotics	115
6.4. The hermeneutic view of robots.	119
Chapter 7. Enhancement as a Cipher of the Future.	123
7.1. Introduction and overview	123
7.2. On the semantics of (technical) enhancement.	125
7.2.1. Enhancement as action.	125
7.2.2. Technical enhancement	127
7.3. Human enhancement	128
7.3.1. Enhancement in history: some ambivalences	128
7.3.2. Human enhancement: some illustrations	130
7.3.3. Healing, doping and enhancement	132
7.3.4. Human enhancement: from visions to the marketplace.	136
7.4. Animal enhancement	138
7.5. Conclusions.	142
7.5.1. Conclusions I: dissolving borders between humans, animals and technology	142
7.5.2. Conclusions II: better understanding contemporary time	144
7.5.3. Conclusions III: technicalizing the self-image of humans	148
7.5.4. Conclusions IV: RRI debates on enhancement	149
7.6. Enhancement as a cipher of the future	151

Chapter 8. Technology to Combat Climate Change: the Hermeneutic Dimension of Climate Engineering	153
8.1. Climate change and the ambivalence of technology	153
8.2. Limitations of the previous approaches to finding a solution	156
8.3. Climate engineering as a technical option	157
8.4. Chances and risks of climate engineering	159
8.5. The hermeneutics of climate engineering	162
8.5.1. Climate engineering: revival of Baconism?	163
8.5.2. Expanding the object of responsibility	166
8.6. Epilogue: hermeneutic extension of the imperative of responsibility?	168
Chapter 9. Hermeneutic Assessment: Toward an Interdisciplinary Research Program	169
9.1. Assigning meaning to NEST as object of responsibility	169
9.2. Hermeneutic approaches	172
9.3. The emergence of NEST meaning: hermeneutic assessment	175
9.3.1. The dynamics of assigning meaning	175
9.3.2. NEST meaning: understanding origin and process	178
9.3.3. NEST meaning: understanding content	180
9.3.4. NEST meaning: understanding diffusion and impact	183
9.4. Reflection and epilogue.	185
Inspiration Behind the Chapters	189
Bibliography	191
Index	215
