

Table of Contents

Preface	xi
Chapter 1. Introduction	1
1.1. Motivation	1
1.2. Networks	2
1.3. Traffic	3
1.4. Queues	5
1.5. Structure of the book	5
1.6. Bibliography	6
Chapter 2. Exponential Distribution	9
2.1. Definition	9
2.2. Discrete analog	10
2.3. An amnesic distribution	12
2.4. Minimum of exponential variables	13
2.5. Sum of exponential variables	15
2.6. Random sum of exponential variables	16
2.7. A limiting distribution	16
2.8. A “very” random variable	17
2.9. Exercises	18
2.10. Solution to the exercises	20

Chapter 3. Poisson Processes	23
3.1. Definition	23
3.2. Discrete analog	25
3.3. An amnesic process	27
3.4. Distribution of the points of a Poisson process	27
3.5. Superposition of Poisson processes	28
3.6. Subdivision of a Poisson process	29
3.7. A limiting process	30
3.8. A “very” random process	30
3.9. Exercises	31
3.10. Solution to the exercises	32
 Chapter 4. Markov Chains	 35
4.1. Definition	36
4.2. Transition probabilities	36
4.3. Periodicity	37
4.4. Balance equations	38
4.5. Stationary measure	38
4.6. Stability and ergodicity	39
4.7. Finite state space	40
4.8. Recurrence and transience	41
4.9. Frequency of transition	42
4.10. Formula of conditional transitions	43
4.11. Chain in reverse time	43
4.12. Reversibility	44
4.13. Kolmogorov’s criterion	46
4.14. Truncation of a Markov chain	47
4.15. Random walk	49
4.16. Exercises	51
4.17. Solution to the exercises	52
 Chapter 5. Markov Processes	 57
5.1. Definition	57
5.2. Transition rates	58

5.3. Discrete analog	59
5.4. Balance equations	60
5.5. Stationary measure	61
5.6. Stability and ergodicity	61
5.7. Recurrence and transience	63
5.8. Frequency of transition	63
5.9. Virtual transitions	64
5.10. Embedded chain	66
5.11. Formula of conditional transitions	68
5.12. Process in reverse time	68
5.13. Reversibility	70
5.14. Kolmogorov's criterion	70
5.15. Truncation of a reversible process	71
5.16. Product of independent Markov processes	73
5.17. Birth–death processes	74
5.18. Exercises	74
5.19. Solution to the exercises	78
Chapter 6. Queues	87
6.1. Kendall's notation	87
6.2. Traffic and load	88
6.3. Service discipline	90
6.4. Basic queues	91
6.5. A general queue	97
6.6. Little's formula	99
6.7. PASTA property	101
6.8. Insensitivity	101
6.9. Pollaczek–Khinchin's formula	102
6.10. The observer paradox	105
6.11. Exercises	108
6.12. Solution to the exercises	111
Chapter 7. Queuing Networks	119
7.1. Jackson networks	119
7.2. Traffic equations	120

7.3. Stationary distribution	122
7.4. MUSTA property	124
7.5. Closed networks	125
7.6. Whittle networks	127
7.7. Kelly networks	129
7.8. Exercises	131
7.9. Solution to the exercises	133
Chapter 8. Circuit Traffic	141
8.1. Erlang's model	141
8.2. Erlang's formula	142
8.3. Engset's formula	145
8.3.1. Model without blocking	146
8.3.2. Model with blocking	147
8.4. Erlang's waiting formula	149
8.4.1. Waiting probability	149
8.4.2. Mean waiting time	150
8.5. The multiclass Erlang model	151
8.6. Kaufman–Roberts formula	154
8.7. Network models	155
8.8. Decoupling approximation	157
8.9. Exercises	157
8.10. Solutions to the exercises	160
Chapter 9. Real-time Traffic	167
9.1. Flows and packets	167
9.2. Packet-level model	168
9.3. Flow-level model	171
9.4. Congestion rate	173
9.5. Mean throughput	174
9.6. Loss rate	176
9.7. Multirate model	177
9.8. Recursive formula	179
9.9. Network models	179

9.10. Gaussian approximation	181
9.11. Exercises	183
9.12. Solution to the exercises	185
Chapter 10. Elastic Traffic	191
10.1. Bandwidth sharing	191
10.2. Congestion rate	194
10.3. Mean throughput	195
10.4. Loss rate	197
10.5. Multirate model	199
10.6. Recursive formula	202
10.7. Network model	204
10.8. Exercises	205
10.9. Solution to the exercises	208
Chapter 11. Network Performance	215
11.1. IP access networks	215
11.1.1. Poisson arrivals	216
11.1.2. Finite population	217
11.1.3. Approximation	218
11.2. 2G mobile networks	219
11.2.1. Voice traffic	219
11.2.2. Data traffic	221
11.3. 3G mobile networks	223
11.3.1. Uplink	223
11.3.2. Downlink	225
11.4. 3G+ mobile networks	228
11.4.1. Homogeneous case	228
11.4.2. Heterogeneous case	228
11.5. WiFi access networks	231
11.5.1. UDP traffic	233
11.5.2. TCP traffic	236
11.5.3. Random traffic	237

11.6. Data centers	238
11.6.1. Static routing	238
11.6.2. Greedy routing	239
11.6.3. Adaptive routing	240
11.7. Cloud computing	241
11.8. Exercises	242
11.9. Solution to the exercises	245
Index	251
