Foreword	xi
Acknowledgments	xiii
List of Abbreviations	xvii
Part 1. A Present-Day Imperative	1
Chapter 1. A Present-Day Imperative To Think or Not To Think...	3
1.1. Where are we by now?	3
1.2. Situating this book.	8
1.3. From local to global to complex	11
1.4. In search for growth.	14
1.5. On futures and their values.	15
Chapter 2. Situating Growth in Time–Space	17
2.1. Two six thousand day lapses.	17
2.2. Complexity to the fore	19
2.3. The message is not the content	21
2.4. On the approach taken by this book	25
Chapter 3. Dominant Thinkings of the Past Century	27
3.1. Economic dynamics evolved	27
3.2. Change and no change: the art of governance.	28
3.3. What’s in a “dominant design”?	29

3.4. Why are dominant designs important to consider?	32
3.5. Operating dominant designs on an example.	33
3.6. Categorizing four general fixations found in the economic world	34
3.7. On the remarkable fixation on competition	39
3.8. Implementing the defixation process	41
Chapter 4. The Historical Contribution of System Dynamics	43
4.1. The pioneering work at MIT.	43
4.2. The historical quest for cracking the “world problématique”	45
4.3. The historical outlet with the Club of Rome	47
4.4. On complex systems and the legacy relevance of system dynamics	47
4.5. On the psychology of “not wanting to know”	48
4.6. Some prevalent differences and similarities with the seventies	50
4.7. Getting away from system dynamics from now?	52
4.8. The position taken in this book	54
Part 2. A Methodology for Tackling Growth Problematics	57
Chapter 5. In Search for New Approaches Fit-For-Purpose.	59
5.1. A GDP comfort zone	59
5.2. In search for growth.	62
5.3. How to correctly model the situation problematics	66
5.4. Leaving duality	67
5.5. The ever-growing complexity	70
5.6. Searching for a representation framework beyond set theory	73
5.7. Shifting from problem-based to design-based methods	79
Chapter 6. Angling the Core Subject Appropriately	81
6.1. Principle 1: find the “lowest lever point”	81
6.2. Principle 2: divide to multiply.	83
6.2.1. An example	84
6.2.2. The overall scheme.	84

6.3. Principle 3: going from the “two” to the “three”	85
6.4. Practical considerations.	89
6.5. Case: reflections from a Haitian context.	91
6.6. An asset base for growth	93
6.7. The exponential movement	94
6.8. The economic equation	96
6.9. Relationship with SDGs	96
Chapter 7. Cracking Open a Growth Concept.	101
7.1. On the presence of dominant designs.	101
7.2. Some background knowledge relevant to GDP.	104
7.3. Discussing GDP features	107
7.4. Evidencing past GDP’s dominant designs and breaking axes.	107
7.5. A framed template for “new growth”.	108
7.6. Charting GDP’s dominant designs and breaking axes.	112
7.7. Blueprinting new growth concepts	117
7.8. Expanding on growth-related concepts	119
Chapter 8. Opening Up New Growth Axes	123
8.1. Energy is everything; efficiency best manages it.	123
8.2. Option one: “electrifying GDP”.	125
8.3. Option two: “efficiency GDP”.	126
8.4. A side note	127
8.5. On distribution and its criteria.	128
Part 3. Going Beyond the Notion of GDP	131
Chapter 9. New Growth Operational Formulations with Examples	133
9.1. A quick return to system dynamics	133
9.2. How to balance the disequilibria by injecting a conduct way	135
9.3. Why isn’t a circular economy enough?	138
Chapter 10. Discussing Work, Labor and Money	141
10.1. Is work still on demand?	141
10.2. Cultural factors underpinning work.	142
10.3. Work: background knowledge.	144

10.4. Fixations on work	144
10.5. Work: dominant designs and breaking axes	146
10.6. Blueprint concepts for extending the notion of work	148
10.7. Expanding the notion of work towards a cooperation principle	149
10.8. The fixations on money	150
Chapter 11. Case Study: Growth Through Cooperation, Work, Time and Space	153
11.1. Evolving work in co-working settings	153
11.2. Why co-working as a subject matter?	154
11.3. Generations of co-working spaces don't act on the same premises.	155
11.4. Departing from some current views opens up future co-working spaces	158
11.5. Using C-K theory for thinking future co-working spaces	158
11.6. Giving thought to today's 1.0 co-working spaces.	159
11.6.1. What's critically missing in current CWS interpretations?	161
11.6.2. Limits to the concept: is this a co-working space?	161
11.6.3. Extending and reformulating the state-of-the-art for more conceptual expansions.	163
11.6.4. Structuring the K space for opening up ensuing C expansions	164
11.6.5. Summarizing this thinking.	165
11.7. Mechanisms for expanding the original concept	166
11.8. What may be a language for "working together?"	167
11.9. Founding experiments – the protocol and schedule	168
11.9.1. Evolving the results obtained: socio-economic implications	171
11.10. Concluding with some considerations for the future.	172
11.11. Acknowledgments	173
11.12. Further reading	173
Chapter 12. A Society's New Clothes	177
12.1. The main messages from this book	177
12.2. Enhancing dynamics.	179
12.3. Consciousness as the molding factor?	180

Part 4. Appendices	185
Appendix 1. A Short Primer on C-K Theory	187
Appendix 2. Some Chronological Reports to The Club of Rome Commented	199
Bibliography	201
Index	211
