<b>Introduction</b> . . . . .	ix
Mamadou Kaba TRAORÉ	

<b>Chapter 1. How Can Modeling and Simulation Help Engineering of System of Systems?</b> . . . . .	1
Bernard P. ZEIGLER	

1.1. Introduction . . . . .	1
1.2. Background . . . . .	4
1.2.1. Modeling and Simulation Framework . . . . .	4
1.2.2. DEVS simulation protocol . . . . .	5
1.2.3. The system entity structure ontology framework . . . . .	7
1.2.4. Pruning of the system entity structure . . . . .	9
1.3. Positive and negative emergence . . . . .	11
1.3.1. Negative emergence . . . . .	11
1.3.2. Positive emergence . . . . .	13
1.4. Emergence in National Healthcare Systems . . . . .	14
1.4.1. M&S-based design of health care service systems . . . . .	15
1.4.2. Overview of DEVS methodology for coordination modeling . . . . .	17
1.4.3. Health care as a learning collaborative SoS . . . . .	18
1.5. DEVS coordination pathways . . . . .	20
1.5.1. Individual-based coordination of cross-system transactions . . . . .	21
1.5.2. Pathways as coordination models . . . . .	22
1.5.3. Atomic pathways models . . . . .	22
1.5.4. Coupled pathways models . . . . .	25
1.5.5. Porter's IPU . . . . .	26
1.5.6. Pathways-based cost measurement . . . . .	29

1.6. Example: coordinated HIV-AIDS care system model . . . . .	30
1.6.1. Pathways-based learning system implementation . . . . .	33
1.6.2. ACA applied to HIV-AIDS example . . . . .	35
1.6.3. Current state of DEVS framework for a coordinated learning health care system . . . . .	36
1.7. Conclusions and further research . . . . .	39
1.8. Bibliography . . . . .	41
 <b>Chapter 2. Multidisciplinary, Interdisciplinary and Transdisciplinary Federations in Support of New Medical Simulation Concepts: Harmonics for the Music of Life . . . . .</b>	47
Andreas TOLK	
2.1. Introduction . . . . .	47
2.2. Multi-, inter- and transdisciplinary approaches . . . . .	49
2.3. M&S processes . . . . .	50
2.4. Hybrid M&S solutions . . . . .	54
2.5. Medical simulation in support of systems biology . . . . .	56
2.6. Concluding remarks . . . . .	57
2.7. Bibliography . . . . .	58
 <b>Chapter 3. Heterogeneous Computing: An Emerging Paradigm of Embedded Systems Design . . . . .</b>	61
Abderazak BEN ABDALLAH	
3.1. Introduction . . . . .	61
3.1.1. Heterogeneous MCSoC . . . . .	64
3.1.2. Homogeneous MCSoC . . . . .	66
3.1.3. Multicore SoC applications . . . . .	66
3.1.4. Applications mapping . . . . .	68
3.2. MCSoC building blocks . . . . .	70
3.2.1. Processor core . . . . .	71
3.2.2. Memory . . . . .	72
3.2.3. Cache . . . . .	73
3.2.4. IP cores . . . . .	77
3.2.5. IP cores with multiple clock domains . . . . .	78
3.2.6. Selection of IP cores . . . . .	79
3.3. MCSoC memory hierarchy . . . . .	80
3.3.1. Types of on-chip memory . . . . .	81
3.3.2. Scratchpad memory . . . . .	83
3.3.3. Off-chip memory . . . . .	84
3.3.4. Memory power reduction in SoC designs . . . . .	85

3.4. Memory consistency in multicore systems . . . . .	86
3.4.1. Cache coherence problem . . . . .	88
3.4.2. Cache coherence protocols . . . . .	90
3.5. Conclusion . . . . .	92
3.6. Bibliography . . . . .	92
<b>Chapter 4. Numerical Reproducibility of Parallel and Distributed Stochastic Simulation Using High-Performance Computing. . . . .</b>	<b>95</b>
David R.C. HILL	
4.1. Introduction . . . . .	95
4.2. Reproducibility and its usefulness for parallel simulation . . . . .	96
4.3. Why do we encounter non-reproducibility? . . . . .	99
4.3.1. The scientific publication culture . . . . .	99
4.3.2. Impact of hardware accelerators . . . . .	100
4.3.3. Impact of software . . . . .	101
4.3.4. Floating point operations . . . . .	101
4.3.5. Technique to distribute random parallel streams . . . . .	102
4.4. Some recommendations . . . . .	103
4.5. Conclusion . . . . .	106
4.6. Bibliography . . . . .	107
<b>List of Authors . . . . .</b>	<b>111</b>
<b>Index . . . . .</b>	<b>113</b>
