<b>Acknowledgements</b> . . . . .	xv
<b>Preface</b> . . . . .	xvii
<b>Chapter 1. Advances in Portfolio Risk Control</b> . . . . .	1
Winfried G. HALLERBACH	
1.1. Introduction . . . . .	1
1.2. The empirical example and preliminaries . . . . .	3
1.2.1. Money allocation versus risk allocation. . . . .	4
1.2.2. Implied risk premia and the implied Sharpe ratios. . . . .	5
1.3. Maximum Sharpe ratio portfolio (MSRP) . . . . .	7
1.4. 1/N or equal-weighting . . . . .	9
1.5. Minimum variance portfolio (MVP) . . . . .	10
1.6. Maximum diversification portfolio (MDP) . . . . .	12
1.7. Equal risk contribution portfolio (ERCP): full risk parity . . . . .	14
1.8. Inverse volatility portfolio (IVP): naive risk parity . . . . .	18
1.9. Volatility weighting over time . . . . .	19
1.10. Evaluation. . . . .	21
1.11. Appendix . . . . .	23
1.11.1. Asset and portfolio (excess) returns . . . . .	23
1.11.2. Marginal and component contributions to portfolio (excess) return . . . . .	23
1.11.3. Portfolio risk premium . . . . .	24
1.11.4. Portfolio variance . . . . .	24
1.11.5. Decomposing portfolio volatility. . . . .	24
1.11.6. Portfolio optimality: maximize the Sharpe ratio . . . . .	26
1.11.7. Reverse optimization: implied risk premia . . . . .	28
1.12. Bibliography . . . . .	28

<b>Chapter 2. Smart Beta: Managing Diversification of Minimum Variance Portfolios</b> . . . . .	31
Jean-Charles RICHARD and Thierry RONCALLI	
2.1. Introduction . . . . .	31
2.2. Risk-based investing and variance minimization . . . . .	33
2.2.1. MV portfolio . . . . .	34
2.2.2. ERC portfolio . . . . .	35
2.2.3. Most diversified portfolio . . . . .	37
2.2.4. Comparing the trade-off relationships . . . . .	39
2.3. Managing the diversification . . . . .	41
2.3.1. Mixing the constraints . . . . .	41
2.3.2. A unified optimization framework . . . . .	43
2.3.3. Diversification profile of risk-based portfolios . . . . .	45
2.4. Understanding the behavior of smart beta portfolios . . . . .	48
2.4.1. Volatility reduction . . . . .	50
2.4.2. Normalizing the smart beta portfolios . . . . .	51
2.4.3. Performance of the smart beta portfolios . . . . .	53
2.4.4. Dynamic smart beta strategies . . . . .	55
2.5. Conclusion . . . . .	55
2.6. Appendix . . . . .	56
2.6.1. Managing the tracking error volatility . . . . .	56
2.6.2. Solving the general optimization problem using the CCD algorithm . . . . .	57
2.7. Bibliography . . . . .	62
<b>Chapter 3. Trend-Following, Risk-Parity and the Influence of Correlations</b> . . . . .	65
Nick BALTAS	
3.1. Introduction . . . . .	65
3.2. Methodology . . . . .	69
3.2.1. Constructing a trend-following strategy . . . . .	69
3.2.2. Volatility-parity scheme . . . . .	70
3.3. Data description . . . . .	71
3.4. Performance evaluation of trend-following . . . . .	74
3.4.1. Volatility-parity ignores pairwise correlations . . . . .	77
3.5. Risk-parity principles . . . . .	80
3.5.1. Risk-parity . . . . .	80
3.5.2. Risk-budgeting . . . . .	82
3.5.3. Long-short risk-budgeting . . . . .	83
3.5.4. Trend-following meets risk-parity . . . . .	84
3.6. Performance evaluation of risk-parity trend-following . . . . .	85
3.7. Conclusion . . . . .	91

3.8. Appendix: solving for risk parity . . . . .	91
3.9. Bibliography . . . . .	92
<b>Chapter 4. Diversifying Risk Parity: In Today, Out Tomorrow?</b> . . . . .	97
Harald LOHRE, Heiko OPFER and Gábor ORSZÁG	
4.1. Managing diversification . . . . .	99
4.2. Rationalizing principal portfolios . . . . .	101
4.2.1. Data and descriptive statistics . . . . .	101
4.2.2. Extracting and interpreting principal portfolios . . . . .	102
4.3. Risk-based asset allocation . . . . .	106
4.3.1. Risk-based asset allocation schemes . . . . .	106
4.3.2. Performance of risk-based asset allocation schemes . . . . .	110
4.3.3. How diversified are the risk-based asset allocation schemes? . . . . .	112
4.3.4. In today, out tomorrow? Risk-based strategies in a rising interest rate environment . . . . .	118
4.4. Conclusion . . . . .	119
4.5. Acknowledgments . . . . .	120
4.6. Bibliography . . . . .	121
<b>Chapter 5. Robust Portfolio Allocation with Systematic Risk Contribution Restrictions</b> . . . . .	123
Serge DAROLLES, Christian GOURIEROUX and Emmanuelle JAY	
5.1. Introduction . . . . .	123
5.2. Portfolio allocation with risk contribution restrictions . . . . .	126
5.2.1. Minimum risk portfolios . . . . .	126
5.2.2. Portfolios with risk contribution restrictions . . . . .	126
5.2.3. Risk contribution restrictions and portfolio turnover . . . . .	127
5.3. Portfolio allocation with systematic risk contribution restrictions . . . . .	129
5.3.1. Systematic and idiosyncratic risks . . . . .	129
5.3.2. Systematic and idiosyncratic risk contributions . . . . .	130
5.3.3. Portfolios with systematic risk contribution restrictions . . . . .	131
5.4. Illustrations with different risk measures . . . . .	132
5.4.1. The volatility risk measure . . . . .	132
5.4.2. The $\alpha$ -VaR risk measure . . . . .	133
5.4.3. Distorsion risk measures . . . . .	136
5.5. Application . . . . .	136
5.5.1. The investment universe . . . . .	136
5.5.2. Portfolio management with total risk contribution restrictions . . . . .	137

5.5.3. Portfolio management with systematic risk contribution Restrictions . . . . .	139
5.6. Concluding remarks . . . . .	143
5.7. Bibliography . . . . .	144
<b>Chapter 6. Risk-Based Investing but What Risk(s)?</b> . . . . .	147
Emmanuel JURCZENKO and Jérôme TEILETCHE	
6.1. Introduction . . . . .	147
6.2. Expected shortfall as risk measure . . . . .	148
6.2.1. Expected shortfall: definition and properties . . . . .	148
6.2.2. Contribution to expected shortfall and risk-based portfolios . . . . .	150
6.3. Broadening risk measures . . . . .	151
6.3.1. Volatility and correlation risks . . . . .	151
6.3.2. Valuation risk . . . . .	151
6.3.3. Asymmetry and tail risks . . . . .	152
6.3.4. Illiquidity risk . . . . .	154
6.4. Empirical results . . . . .	154
6.4.1. Data overview and preliminary analysis . . . . .	154
6.4.2. Equal risk contribution under different risk models . . . . .	158
6.5. Conclusion . . . . .	160
6.6. Mathematical Appendix . . . . .	161
6.7. Data Appendix . . . . .	167
6.8. Bibliography . . . . .	170
<b>Chapter 7. Target Volatility</b> . . . . .	173
Bernd SCHERER	
7.1. Introduction . . . . .	173
7.2. Better leverage and the Samuelson puzzle . . . . .	174
7.3. Target volatility and Sharpe ratio improvement . . . . .	177
7.4. Informative or uninformative leverage . . . . .	182
7.5. Target volatility and tail hedging . . . . .	185
7.6. Asymmetric leverage . . . . .	187
7.7. Target volatility across asset classes . . . . .	189
7.8. Conclusions . . . . .	191
7.9. Bibliography . . . . .	193
<b>Chapter 8. Smart Beta Equity Investing Through Calm and Storm</b> . . . . .	195
Kris BOUDT, Joakim DARRAS, Giang HA NGUYEN and Benedict PEETERS	
8.1. Introduction . . . . .	195

8.2. A regime switching approach to market timing . . . . .	198
8.2.1. Faber’s timing model based on rolling price averages . . . . .	198
8.2.2. Timing model based on the predicted return distribution from a mean-variance regime switching model with state variables driving the transition probabilities . . . . .	200
8.2.3. Performance evaluation . . . . .	204
8.3. Sample and variable description . . . . .	205
8.3.1. Choice of risky asset . . . . .	205
8.3.2. Variables in the multivariate regression model. . . . .	206
8.4. Results . . . . .	207
8.4.1. Impact of choice of smart beta equity strategies on portfolio performance. . . . .	210
8.4.2. Impact of market timing strategies on portfolio performance . . . . .	212
8.5. Conclusion . . . . .	220
8.6. Acknowledgments . . . . .	220
8.7. Appendix . . . . .	220
8.7.1. Hamilton’s filter. . . . .	221
8.7.2. Calculation of expected shortfall of stock returns under the RS model . . . . .	221
8.8. Bibliography . . . . .	222
<b>Chapter 9. Solving the Rebalancing Premium Puzzle . . . . .</b>	<b>227</b>
Vladyslav DUBIKOVSKYY and Gabriele SUSINNO	
9.1. Introduction . . . . .	227
9.2. Rebalancing as a risk premium . . . . .	229
9.3. Probing the limits: when simulations provide more insight . . . . .	233
9.4. Beating the best asset: a path to the low-risk anomaly explanation . . . . .	236
9.5. When rebalancing pays off . . . . .	239
9.6. Conclusions . . . . .	243
9.7. Appendix . . . . .	244
9.7.1. Rebalancing premium: the multi-asset case . . . . .	244
9.8. Bibliography . . . . .	245
<b>Chapter 10. Smart Betas: Theory and Construction . . . . .</b>	<b>247</b>
Attilio MEUCCI	
10.1. Introduction . . . . .	247
10.2. Signals. . . . .	248
10.3. Fundamental law of active management . . . . .	252

10.4. Factors construction . . . . .	255
10.4.1. Direct construction . . . . .	256
10.4.2. Characteristic portfolios . . . . .	257
10.5. Conclusions . . . . .	263
10.6. Bibliography . . . . .	263
<b>Chapter 11. Low-Risk Anomaly Everywhere: Evidence from Equity Sectors . . . . .</b>	<b>265</b>
Raul Leote DE CARVALHO, Majdouline ZAKARIA, Xiao LU and Pierre MOULIN	
11.1. Introduction . . . . .	265
11.2. Low volatility or low beta? . . . . .	267
11.3. Sector-neutral low-risk investing . . . . .	270
11.3.1. Motivation . . . . .	270
11.3.2. Universality of the low-risk anomaly in equity sectors. . . . .	273
11.3.3. Diversification in sector-neutral low-volatility investing . . . . .	277
11.3.4. Tail risk in sector-neutral low-volatility investing . . . . .	279
11.4. Sector-neutral versus non-sector neutral low-risk investing . . . . .	281
11.4.1. Performance and sector exposures . . . . .	281
11.4.2. Persistence of volatility . . . . .	283
11.4.3. Liquidity of low-volatility strategies. . . . .	284
11.5. Conclusions . . . . .	285
11.6. Acknowledgments . . . . .	287
11.7. Bibliography . . . . .	287
<b>Chapter 12. The Low Volatility Anomaly and the Preference for Gambling . . . . .</b>	<b>291</b>
Jason C. HSU and Vivek VISWANATHAN	
12.1. Introduction . . . . .	291
12.2. A brief review of the literature . . . . .	293
12.3. Lottery and volatility double sort . . . . .	296
12.4. International evidence . . . . .	298
12.5. Conclusion . . . . .	300
12.6. Appendix . . . . .	300
12.7. Bibliography . . . . .	302
<b>Chapter 13. The Low Beta Anomaly and Interest Rates . . . . .</b>	<b>305</b>
Cherry MUIJSSON, Ed FISHWICK and Steve SATCHELL	
13.1. Literature review . . . . .	307
13.2. The anomaly and interest rates . . . . .	309
13.3. Model specification . . . . .	311
13.4. Empirical analysis and results . . . . .	312

13.5. The anomaly and interest maturity mismatch . . . . .	318
13.6. Model specification . . . . .	321
13.7. Results. . . . .	323
13.8. Concluding remarks . . . . .	325
13.9. Bibliography . . . . .	326
<b>Chapter 14. Factoring Profitability</b> . . . . .	329
Lisa R. GOLDBERG, Ran LESHEM and Michael BRANCH	
14.1. Quality is an active investment strategy with a long and distinguished history . . . . .	330
14.2. Replicating gross profitability with style factors . . . . .	331
14.3. The four-factor Fama–French–Carhart model does not explain gross profitability . . . . .	332
14.4. The Barra USE4 model explains a substantial portion of gross profitability over the past two decades. . . . .	333
14.5. Conclusion . . . . .	336
14.6. Disclosure . . . . .	336
14.7. Bibliography . . . . .	337
<b>Chapter 15. Deploying Multi-Factor Index Allocations in Institutional Portfolios</b> . . . . .	339
Jennifer BENDER, Remy BRIAND, Dimitris MELAS, Raman Aylur SUBRAMANIAN and Madhu SUBRAMANIAN	
15.1. Introduction . . . . .	339
15.2. Implementing factors through multi-factor index allocations . . . . .	340
15.2.1. Multi-factor indexes: a new approach for institutional mandates . . . . .	340
15.2.2. Deploying factor allocations . . . . .	343
15.3. Selecting the right blend of factors . . . . .	345
15.3.1. Correlations matter when selecting factors: the diversification effects of multi-factor index allocations . . . . .	346
15.3.2. Considerations for combining factor indexes . . . . .	349
15.4. Implementation considerations . . . . .	351
15.4.1. Understanding the exposure versus investability trade-off . . . . .	351
15.4.2. Reducing trading costs by leveraging the benefits of natural crossing . . . . .	357
15.5. Multi-factor index allocations: examples. . . . .	359
15.5.1. Example #1: Strategic long-term risk-adjusted return . . . . .	360
15.5.2. Example #2: De-risking with yield enhancement. . . . .	361

15.6. Conclusion . . . . .	363
15.7. Bibliography . . . . .	363
<b>Chapter 16. Defining the Equity Premium, a Framework . . . . .</b>	<b>365</b>
Yves CHOUEIFATY and Christophe ROEHRI	
16.1. Introduction . . . . .	366
16.2. Defining the equity premium . . . . .	368
16.3. Risk-rewards homogeneity and the equity premium . . . . .	370
16.4. A taxonomy of smart beta and risk factors driven strategies . . . . .	370
16.5. Being practical: a core-satellite portfolio allocation. . . . .	371
16.6. Conclusion . . . . .	374
16.7. Bibliography . . . . .	375
<b>Chapter 17. Designing Multi-Factor Equity Portfolios . . . . .</b>	<b>377</b>
Noël AMENC, Romain DEGUEST, Felix GOLTZ, Ashish LODH, Lionel MARTELLINI and Eric SHIRBINI	
17.1. Introduction . . . . .	377
17.1.1. Designing efficient and investable proxies for risk premia. . . . .	378
17.1.2. Risk allocation with smart factor indices . . . . .	380
17.2. Absolute return perspective . . . . .	381
17.2.1. Absolute risk management without factor risk exposure constraints . . . . .	382
17.2.2. Introducing risk-budgeting constraints . . . . .	385
17.2.3. Long-term evidence in the USA universe . . . . .	390
17.3. Relative risk perspective. . . . .	391
17.3.1. Methodology. . . . .	392
17.3.2. Risk contributions and performance . . . . .	393
17.3.3. Relative risk allocation using long-term USA factor indices. . . . .	395
17.4. Conclusion: index design and allocation decisions for multi-factor equity portfolios. . . . .	397
17.5. Bibliography . . . . .	398
<b>Chapter 18. Factor Investing and Portfolio Construction Techniques . . . . .</b>	<b>401</b>
Yin LUO and Spyros MESOMERIS	
18.1. Introduction . . . . .	401
18.2. Risk factor investing: the new paradigm . . . . .	402
18.3. Theory meets practice . . . . .	403
18.4. Taxonomy of risk premia strategies . . . . .	406

18.5. Is risk premia allocation inherently superior to asset-class allocation? . . . . .	410
18.5.1. Efficient frontier analysis . . . . .	411
18.6. Portfolio construction techniques . . . . .	414
18.7. An alternative approach for defining diversification . . . . .	417
18.7.1. Introducing the copula model. . . . .	418
18.7.2. Minimum tail dependence portfolio optimization algorithm. . . . .	420
18.7.3. Alternative beta portfolios . . . . .	421
18.8. An alternative definition of risk . . . . .	423
18.8.1. Minimum CVaR portfolio . . . . .	423
18.8.2. CVaR optimization theory . . . . .	424
18.8.3. Mean-CVaR efficient frontier and minimum CVaR portfolio . . . . .	424
18.8.4. Robust minimum CVaR optimization . . . . .	424
18.8.5. Choice of alpha parameter . . . . .	428
18.9. Comparison of different risk-based portfolio construction techniques . . . . .	428
18.9.1. The philosophy of portfolio construction . . . . .	428
18.9.2. A horse race of risk-based portfolio construction techniques . . . . .	430
18.10. Conclusion. . . . .	430
18.11. Bibliography. . . . .	431
<b>Chapter 19. Multi-Factor Portfolio Construction for Passively Managed Factor Portfolios . . . . .</b>	<b>435</b>
Jennifer BENDER and Taie WANG	
19.1. A short history of passively managed factor portfolios . . . . .	435
19.2. Single-factor portfolio construction. . . . .	436
19.3. Why combine multiple factors? . . . . .	439
19.4. Multi-factor portfolio construction . . . . .	442
19.5. Conclusion . . . . .	445
19.6. Appendix A: description of tilted factor portfolios . . . . .	446
19.7. Bibliography . . . . .	447
<b>Chapter 20. Statistical Overfitting and Backtest Performance . . . . .</b>	<b>449</b>
David H. BAILEY, Stephanie GER, Marcos LOPEZ DE PRADO and Alexander SIM	
20.1. Introduction. . . . .	450
20.2. Backtest overfitting in finance and investments . . . . .	451
20.3. Quantifying backtest overfitting effects . . . . .	453
20.4. An online demonstration of backtest overfitting. . . . .	454

20.4.1. Simple example of backtest overfitting (SEBO) . . . . .	455
20.4.2. How SEBO is used . . . . .	456
20.4.3. Understanding the results . . . . .	457
20.5. Conclusion . . . . .	459
20.6. Acknowledgments . . . . .	460
20.7. Bibliography . . . . .	460
<b>List of Authors</b> . . . . .	463
<b>Index</b> . . . . .	467
