ACRONYMS	ix
INTRODUCTION	xiii
CHAPTER 1. WIRELESS AND MOBILE NETWORKS	1
1.1. Introduction	1
1.2. Wireless networks	2
1.2.1. Definition	2
1.2.2. Function of a wireless network	3
1.2.2.1. Network with infrastructure	3
1.2.2.2. Network without infrastructure	4
1.2.3. Types of wireless networks	5
1.2.3.1. Wireless personal area network	6
1.2.3.2. Wireless local area network	6
1.2.3.3. Wireless metropolitan area network	6
1.2.3.4. Wireless wide area network	6
1.2.3.5. Wireless regional area network	6
1.2.4. Different types of existing wireless networks	7
1.2.4.1. Networks using infrared waves	7
1.2.4.2. Networks using radio waves	7
1.2.5. IEEE 802.22 standard	12
1.3. Mobile networks	12
1.3.1. Wireless and mobility	12
1.3.2. Mobility	13
1.3.3. Cellular architecture	13
1.3.4. Architecture of a cellular network	14
1.3.5. Telephony	15

1.3.6. Development of cellular systems	16
1.3.6.1. First generation	16
1.3.6.2. Second generation	16
1.3.6.3. Third generation	18
1.3.6.4. Fourth generation	18
1.4. WiMAX mobile and 4G	19
1.5. Conclusion	20
CHAPTER 2. COGNITIVE RADIO	23
2.1. Introduction	23
2.2. Software radio	24
2.2.1. Software-defined radio	24
2.3. Introduction to cognitive radio	24
2.3.1. History	24
2.3.2. Definition	25
2.3.3. Relationship between cognitive radio and software-defined radio	26
2.3.4. Structure	27
2.3.5. Cognition cycle	29
2.3.6. Components of cognitive radio	31
2.3.7. Functions of cognitive radio	32
2.4. Languages of cognitive radio	35
2.5. Domains of cognitive radio applications	36
2.6. Conclusion	38
CHAPTER 3. MULTI-AGENT SYSTEMS	39
3.1. Introduction	39
3.2. Definition of an agent	39
3.2.1. The multidimensional characteristics of an agent	40
3.2.2. An agent's concrete architecture	41
3.2.2.1. Architecture of logical agents	41
3.2.2.2. Reactive architecture	42
3.2.2.3. BDI architecture	42
3.2.2.4. Multilevel architecture	44
3.2.3. Model of an agent	45
3.3. Multi-agent systems	46
3.3.1. Communication between agents	46
3.3.1.1. Coordination protocols	46
3.3.1.2. Cooperation protocols	47
3.3.1.3. Negotiation	47
3.4. Application of MAS in telecommunications	48

3.4.1. MAS applications on the Web	48
3.4.2. Application of MAS in virtual private networks.	49
3.4.3. Using MAS in the setting of third generation mobiles	50
3.4.4. Application of MAS in network supervision and management	50
3.5. Conclusion	50
CHAPTER 4. DYNAMIC SPECTRUM ACCESS	53
4.1. Introduction.	53
4.2. Intelligent algorithms	54
4.2.1. Neural networks.	55
4.2.2. Fuzzy logic.	56
4.2.3. Genetic algorithms	57
4.3. Dynamic spectrum access	58
4.3.1. Spectrum access using the auction approach.	58
4.3.2. Spectrum access using game theory	59
4.3.3. Spectrum access using Markov's approach.	60
4.3.4. Spectrum access using multi-agent systems	61
4.4. Conclusion	64
BIBLIOGRAPHY	67
FURTHER READING.	75
INDEX	77
